Install cover

PLEASE NOTE THE FOLLOWING:

- By signing below, you certify that you have read and understood this contract and requirements therein.
- By signing this contract, you acknowledge that Winkler Aquatics t/a Swimkare has recommended that your pool has dual drains and vacuum release system and compliant VGB main drain cover(s) as added safety measures to reduce the risk of suction entrapment. Moreover, you expressly hereby forever release and discharge Winkler Aquatics t/a Swimkare, it's employees, servants, and/or agents from any liability that is related in any way to the dangers of suction entrapment.
- Since each pool and its components are individual, we cannot guarantee a time frame for which your pool will swim ready. Factors such as water quality, filter capacity, pump performance, sanitations levels, and basic maintenance are all considerations.
- At time of scheduled opening, if the cover is removed and the pool surface and water are beyond our standard procedures to correct, there will be an added contract amount of \$650.00 for an acid wash (a.k.a. drain and clean). A drain and clean includes pumping out the water entirely and acid washing the sides and bottom of the pool. This is typically done if the algae build up and the debris in the pool is so great that a standard chemical cleaning would not be sufficient.
- By signing this document you are approving up to \$50 in miscellaneous parts replacement, i.e skimmer baskets, pressure gauges, etc.
- **If at time of opening we arrive and your pool is not at operational level (mid-way up the tile line) there will be an additional charge of \$100 for us to return to your residence.**
- **Vacuuming of you pool will be performed by our service technician at the time of opening/service. Depending on the condition of the water at time of opening, we cannot guarantee that our pool will swim ready upon completion. After the initial opening, adequate filter pressure, basic pump maintenance, and adequate sanitation levels must be maintained by the homeowner in order to expedite the water clearing process.**
