

# InKorr

This product is represented in Australia, New Zealand, and PNG by:

## InKorr Pty Ltd

**Address:** Unit 8, 1470 Ferntree Gully Road,  
Knoxfield VIC 3180, Australia  
**Email:** [inkorr.service@inkorr.com.au](mailto:inkorr.service@inkorr.com.au)  
**General:** +61 (0) 413 996 890 (Makarios Wong)  
**Service:** +61 (0) 478 800 003 (Shane Halliwell)

### Contact InKorr Pty Ltd for:

#### Heat Exchangers

- Shell & Tube Heat Exchangers
- Gasketed Plate Heat Exchangers
- Brazed Plate Heat Exchangers
- Crossflow Welded Plate Heat Exchangers
- Plate & Shell Heat Exchangers
- Non Metallic Heat Exchangers
- Corrugated Tube Heat Exchangers
- Spiral Heat Exchangers
- Air-Cooled Heat Exchangers

#### Vessels, Columns, and Equipment manufactured from:

- Exotic Alloys (Ta, Zr, Ti)
- Graphite and Silicon Carbide
- PTFE Lining

#### Plastic Lined Valves and Piping

- PTFE
- PVDF
- PP
- and many more!

#### Servicing and reburishment of heat exchangers!

- Plate cleaning
- NDE for crack testing
- Spare parts, both OEM and aftermarket

# LINED PIPE & FITTINGS

High Performance and Technology Creative company

## Head Office & Factory

#561-11, Gwang Gyeok, Ho-Jeo, Wonju-Si, Kangwon-Do, Korea

Tel : 82-33-731-3550 / Fax : 82-33-731-3559

[www.fluonics.com](http://www.fluonics.com)

# Contents

- 3 Lining Materials
- 4 Pipe
- 5 90° Elbow
- 6 45° Elbow
- 7 Equal Tee
- 8 Reducing Tee
- 9 Concentric Reducer / Eccentric Reducer
- 10 Instrument Tee
- 11 Expansion Joint / PFA Tube

## Lining Materials

### PFA

PFA exhibits thermal characteristics like to PTFE, being able to withstand super low to high temperatures (260°C Maximum temp. for continuous use). It is also transparent and mechanically strong under high temperature. It is easily workable besides applicable with extrusion molding to the same degree as general thermoset plastics. It is used where purity is important, such as semiconductor wafer baskets, piping couplings and non-corrosive linings. PFA has better mechanical strength at high temperatures than FEP, and excellent moldability for easy processing by extrusion, compression, blow, transfer and injection molding methods. Due to the high bonding strength of the carbon, fluorine and oxygen atoms, PFA demonstrates nearly the same outstanding capabilities as PTFE in temperatures ranging from -200°C to +260°C.

### FEP

FEP is a copolymer of tetrafluoroethylene and hexafluoropropylene, FEP consists of carbon atoms and fluorine atoms, as does PTFE, and has a molecular structure in which one of the fluorine atoms bonded to the carbon atoms. FEP has a lower melt viscosity than PTFE and can be processed like other molten thermoplastic resins by extrusion, transfer, injection, and compression molding. Because the bonding energy between its carbon and fluorine atoms is so high, and because the carbon chain is completely surrounded by fluorine atoms, FEP fluorocarbon polymer retains excellent thermal, electrical, and chemical stability. Therefore, it shows high performance in electrical, chemical, and medical applications in temperatures ranging from extremely low to extremely high (-200°C ~ +200°C / -328°F ~ +392°F).

### PTFE

The fluorine atoms completely cover the carbon chain backbone and protect the carbon-carbon bond from attack. The fluorine atoms are also responsible for the low surface energy and exceptional frictional characteristics of PTFE. Because of very high melt viscosity, PTFE does not flow above its melting point. It requires special polymer processing like paste extrusion, compression molding and sintering. Among all the fluoroplastics products, PTFE offers the highest heat resistances at 260°C (maximum temp. for continuous use). It is not corroded by most chemicals and has good electrical insulation and dielectric characteristics. Moreover, it has a unique non-stick property and the lowest coefficient of friction amongst solids. It is the most widely used fluoroplastics, now found in O-rings, gaskets, bearings, tube, wiring, hot plates and irons because of its non-stick property, as well as chemical tank linings.

Property	PFA			FEP			PTFE
