Heat Transfer Equipment

- Shell & Tube Heat Exchangers - Standard, Custom, Corrugated Tubes.
- Plate Heat Exchangers - Brazed, Gasketed, Semi-Welded, & Welded.
- Graphite Heat Exchangers.
- Plate & Shell Heat Exchangers.
- Spiral Heat Exchangers.
- Crossflow Welded Heat Exchangers.
- Direct Steam Injection Heaters.
- Air Coolers.

Corrosion Resistant Equipment - Valves, Piping, Vessels & Systems

- Polymer-Lined Valves, Piping, and Pressure Vessels.
- Exotic Metal (Ta, Zr, Ti) Fabricated Piping and Pressure Vessels.
- Glass-Lined Vessels.
- Graphite Equipment and System Packages.

Service Maintenance

- Plate Heat Exchangers - Refurbishment, Gas Testing, UV Crack Testing.
- Graphite Equipment - Installation, Refurbishment, Repairs.
- Glass-Lined Vessels - Spark Testing, Lining Repair.
- Quality Spare Parts, both OEM and Aftermarket.

Process Heating Solutions Worldwide

Pulp & Paper Industry Case History

Paper Machine System Boil-out

Application

Paper machines periodically require cleaning to remove deposits that accumulate in dead spots or areas of low agitation. Layers of debris can form on wetted surfaces. When particles break loose, it can negatively affect machine run-ability.

Normally performed during shut-downs, fresh water and chemical cleaning agents are used for cleaning. Often temperatures between 140°F and 160°F are desired to optimize the reaction of cleaning chemicals, making precise temperature control critical.

Solution

A Pick Heater is an excellent choice for this application. Instantaneous heating will provide a quicker boil-out cycle. Despite fluctuations in heat load, the Pick Heater provides precise temperature control.

Features and Benefits:

- Instantaneous Supply of Hot Water
- Precise Temperature Control
- Smooth, Stable Operation
