Bingo Jazz Basics: Power-Ups

Power ups jazz up a normal game of bingo by adding rewards and effects to a traditional game! Each power-up has a different purpose when applied.

How power-ups work:

To use power-ups you must have three successful daubs to activate the power-up meter

When charged a random power-up is selected and displayed. Click on it to put it into action.

Once a power-up is selected, the power-up meter is inactive while the meter cools down until it is ready for daubs to charge it up again.

There are 9 power-ups in Bingo Jazz, some are more common than others.

Single daubs mark a random square on the bingo card as a free daub to assist in a valid bingo. This power-up can be used multiple times per round.

Coin squares randomly mark a square on the bingo card with a gold symbol. A successful daub on that square awards a random amount of coins at the end of the round. This power-up can be used multiple times per round.

Present boxes randomly mark a square on the bingo card with the present box icon, when successfully daubed the present box is awarded and will open automatically at the end of the round. This power-up can be used multiple times per round.

Double Daubs randomly mark 2 squares on the bingo card as an added help in obtaining a valid bingo. This power-up can be used multiple times per round.

Double XP doubles the amount of xp collected for every daub for the round. This power-up can be used only once per round.

2X payout awards 2X the payout for coins and bingo chips earned from bingos for the round. This power-up can be used only once per round.

Instant win marks a random square on the bingo card with the instant win icon. When successfully daubed an instant bingo is called. This power-up can be used only once per round.

Super charger, when activated, the power-up meter cools down twice as quick and then will only need 2 daubs to charge the power-up meter again. This power-up can be used only once per round.

Joker, the most powerful power-up in Bingo Jazz, this power up can be activated by clicking on it before the game starts. Once activated an automatic bingo will be awarded for the first successful daub on any card.

Power-ups can be purchased at the top of the screen by clicking on the + symbol next to your power-up balance.

Opening the + will show you the window for purchasing power-up packs and displays how many of each power-up you currently have:

8 pack-1,000 coins

15 pack-2,500 coins

20 pack-5,000 coins

25 pack-\$9.99 *This purchase is made with real money.

Joker pack- 1 ultra-powerful Joker for \$19.99 *This purchase is made with real money.

Bingo Jazz Basics: Levels and XP

XP, or experience points, is earned by successfully daubing squares on your bingo cards. Each level requires a set amount of XP to reach the next level. The amount of XP earned is increased at higher level rooms.

There is no limit to the amount of times you can level up in the game.

Each new level reached earns you rewards of bingo chips, coins, and power-ups, the higher the level, the greater the rewards!

Bingo Jazz Basics: Collection Items

Collection items are an important part of Bingo Jazz. Each room has a set number of collection items, usually 12, that make up that room's collection set. Obtaining each item is necessary to complete the room and receive that room's completion rewards.

Collection items can be obtained in the following ways:

- Getting a bingo on a shadow card
- Winning them in present boxes
- Receiving them as gifts from teammates

You can view the items you have won and the items that are still needed in your inventory.

If the item is filled in it means you have earned it, the items that are dark shadows are still needed to complete the room. The number in the star is the number you have of any one particular item. Beware, if only 1 item is owned and you gift it to a teammate it will disappear from your inventory.

This screen will also display the completion rewards for each room.
