This is so understood by the Scientific Mason of which there are not many. The reason for this is because very few Masons study the subject of Masonry. After they have been initiated in the order, they appear to be satisfied with their social and fraternal relations of membership. To all such, the Signs, Emblems, and Ceremonies, with a few phrases which are used, and passes current among such members, constitutes the general knowledge of what is called and understood among them, as Freemasonry. Therefore it may be seen, with such a superficial understanding of the subject, on the part of many of its members; and with absolute ignorance of others outside the order, concerning the real meaning of the Symbols, and purport in the "Speculative Science of Morals," it would be impossible to expose Freemasonry. All that could be done regarding an exposure would consist in repeating or revealing a few signs, words, or ceremonies, which is very remote from "Speculative Masonry, or the Symbols of Divine Truth," which constitute the principles of Masonry as explained in "Masonic Facts."
