

We are establishing a purpose-built wildlife hospital designed to deliver critical care, rehabilitation and research. This facility will support long-term conservation outcomes, improve animal welfare, and strengthen environmental resilience across the region.

### Sponsors

Support high-impact, visible contributions that drive long-term outcomes.

- Major infrastructure and facility development
- Naming rights (hospital wings, ICU, response units)
- Specialist equipment (ICU, imaging, surgical, rescue)
- Sustainable solutions (e.g. EV fleet, solar, charging stations)
- Brand-aligned partnerships with strong public visibility

### Partners/Investors

Collaborate on innovation, research, and scalable impact.

- Research partnerships (wildlife health, conservation, disease management)
- Co-funded programs and long-term projects
- On-site collaboration opportunities
- Technology and data integration (monitoring, imaging, analytics)
- Large-scale funding and strategic development support

### Donations

Enable immediate, practical impact—every contribution matters.

- Financial donations (one-off or recurring)
- Medical and rehabilitation equipment (ICU, x-ray, treatment tables)
- Consumables (bandages, medications, feeds)
- Operational support (staffing, admin, daily care needs)
- In-kind contributions from industry

### What we need

- Land to establish the facility
- Infrastructure funding (build and fit-out)
- Staffing and operational support
- Specialist equipment and technology
- Ongoing consumables for care and rehabilitation
- Long-term funding to grow and sustain impact

**Help us build a facility that doesn't just treat wildlife—but protects the future of entire ecosystems.**
