

A Completely Unique Approach to Developing Clinical Leaders

*How much budget did you spend on **LEADERSHIP TRAINING**?
How do you show your CFO an ROI? or real business benefit?*

STOP paying for out-dated leadership development that
does nothing for your 2023 **CLINICAL LEADERS**.

Development *JUST* for Clinical Leaders

BUSHIDO BOOTCAMP™

This is **NOT** training centered around a
topic, skill, or competency.

This is MINDSET work

We practice viewing work through a new lens
for authenticity and vulnerability:

It addresses change management,
emotional intelligence, mindfulness, conflict
resolution, quality management, teamwork
and more without multiple training modules!

Think Brené Brown meets Zen

**This modern approach saves
thousands from your training budget.**

- ✓ We combine cohort/classroom work, web-based work, 1-1 coaching, and daily practice. 90% of the work is done at their own pace, just like getting a BSN or MSN
- ✓ This program uses the **AGES** model of learning to effectively change habits and culture.

Bushido-trained leaders focus on 3 mental shifts, then commit to & practice them for 3-6 months with peer accountability. The result is more empathy, authenticity, and a better long-term mindset to manage stress and burnout.
