

School Health Advisory Councils: Developing Recommendations

Welcome

Goal and Objectives

Empower You to Help Your School District Have an Exemplary School Health Advisory Council

**Understand
the value of
a SHAC**

**Understand
the law**

**Provide best
practices:**

- Recruitment
of Parents

- Assessment

- Recommendations
to School Board

**Provide
practical
information,
resources,
and
strategies**

Agenda

**1. Improving Your School's Bottom Line:
Why SHACs Make A Difference**

2. SHAC Basics: Refresher on the Laws

3. Recruiting and Retaining Members

**4. Identifying the Health Issues in the
District and Current Health Activities**

5. Developing Recommendations

6. Wrapping It All Up

A Few Housekeeping Details.....

5/26/2024

Introductions

- Your Name
- Your School District
- Your Role
- Two things you'd like to get out of this workshop

School Health Advisory Councils

**Why They Make
A Difference**

Benefit of Local SHAC

- Compliance with the law
- Parent/community awareness about health status of students
- Local data reviewed and utilized
- Local values incorporated into recommendations to school board
- Parent engagement
- Community support

Promoting Healthy Behaviors

- Refusal Skills
- Decision Making
- Goal Setting
- Communication
- Healthy Relationship Building
- Interest in Alternative Health Promotion Activities

School Health Advisory Councils

Review of the Law

Review of the Law

- Board is to establish SHAC
 - At least 5 members
 - Majority must be parents of students in district
 - Parent shall serve as chair or co-chair
 - Must meet 4 times a year
 - Post meeting notices and minutes, audio/video recordings
- Board must consider recommendations of SHAC
- Board must adopt a policy establishing process for adoption of curriculum materials for human sexuality instruction
- Materials available for review by parents before adoption
- Duties include:
 - Number of hours of instruction (K-8)
 - If Health required for HS graduation # of hours
 - Policies, procedures and curriculum to prevent physical health concerns
 - Obesity
 - Cardiovascular disease
 - Type 2 Diabetes
 - Mental Health (Suicide)
 - Grade levels and methods for human sexuality instruction
 - Strategies for integrating curriculum components in CSH
 - Joint use agreements
 - Parental awareness
 - Risky behaviors (suicide)
 - Available community programs
 - Grade levels for instruction in
 - Child abuse, family violence, dating violence, sex trafficking

School Health Advisory Councils

Engaging Parents

PTA Strategies for Engaging Parents

- ✓ **Welcoming All Families**
- ✓ **Communicating Effectively**
- ✓ **Supporting Student Success**
- ✓ **Speaking Up for Every Child**
- ✓ **Sharing Power**
- ✓ **Collaborating with Community**

Additional Strategies for Engaging Parents

CDC Model

☐ Connect

- ☐ Plan for parent engagement
- ☐ Friendly, welcoming
- ☐ Welcome parents' involvement

☐ Engage

- ☐ Parent focused activities
- ☐ Parent resource center
- ☐ Volunteer opportunities
- ☐ Involve in planning

☐ Sustain

- ☐ Alternative ways to engage
- ☐ Online events
- ☐ Make them feel needed

Additional Strategies for Engaging Parents

GROUP ACTIVITY

Based on the PTA and CDC Strategies, think about the ways your district has engaged parents.

Share with your table group what you have done and what you plan to do based on what you have learned.

Be prepared to report out what you have tried and what you would like to try to get more parents engaged.

School Health Advisory Councils

Assessing the Needs

Recommendations Driven by Data

- Each school within a district is a community
 - Each community is unique
 - The SHAC should represent all schools in the district
 - Assessing the district and each of the school communities is important
- Information and data should drive SHAC recommendations
 - School level (i.e., Campus PEIMs)
 - District level (District STARR, PEIMS, other data collected by district)
 - Community level (Healthcare, law enforcement, churches, etc.)
 - County level (DSHS, Regional health, etc.)
 - State level (SPAN, YRBS, BRFSS)
 - Federal level (Kids Count, National data)

Local Sources of Data

- Local/regional health department
- Local law enforcement
- Local organizations that work with youth
- Local churches
- Local healthcare providers
- Can you think of others? (Activity-At your table, talk about other sources of data or information that you have found. Be ready to report what data sources you use.)

About Texas SPAN

This Texas SPAN Data Explorer provides state-level representative data on school children from the 5 data collection periods ranging from 2000-2002 to 2019-2020.

The overall goal of Texas SPAN is to measure the health of school-aged children in Texas, including nutritional status, activity levels, oral health, and other related behaviors.

The Texas SPAN Project was conducted by researchers at the Michael & Susan Dell Center for Healthy Living at The University of Texas Health Science Center in Houston (UTHealth) School of Public Health in Austin, with funding from the Texas Department of State Health Services (DSHS).

Texas students and their parents surveyed by year:

- 2000-2002: 4th, 8th and 11th graders
- 2004-2005: 4th, 8th and 11th graders
- 2009-2011: 4th graders and their parents; 8th and 11th graders
- 2015-2016: 2nd graders and their parents; 4th, 8th and 11th graders
- 2019-2020: 2nd graders and their parents; 4th, 8th and 11th graders

For more information, visit: go.uth.edu/SPAN

Assessing Current Practices

Determining Current Practices

- ❖ What is currently happening?
 - ❖ Current policy
 - ❖ Current practice
 - ❖ Current curriculum

Program Assessment Tools

The following tools are available for free on the CDC School Health Website

- School Health Index-11 Modules covering WSCC Components
- HECAT-Health Education Curriculum Assessment Tool
- PECAT-Physical Education Curriculum Assessment Tool
- Wellness Policy Assessment Tools
 - WellSat 3.0

School Health Index

Developed by the CDC.

Assessment tool aligns with WSCC model.

Does not have to be done all at once. District can prioritize modules.

It is free and available in printed or online versions.

School Health Index

Has modules to assess all components of WSCC model

1. Physical education and physical activity.
2. Nutrition environment and services.
3. Health education.
4. Social and emotional climate.
5. Physical environment.
6. Health services.
7. Counseling, psychological and social services.
8. Employee wellness.
9. Community involvement.
10. Family engagement.

Our School District's Results

School Health Index

Overall Score Card **Camp Allen ISD**

For each module (row), write an X in the one column where the Module Score falls*

	Low	Medium			High
	0 – 20%	21% – 40%	41% – 60%	61% – 80%	81% – 100%
School Health Policies and Environment –		X			
Health Education –			X		
Physical Education and Physical Activity –		X			
Nutrition Services –				X	
School Health Services –			X		
Counseling, Psychological, Social Services –		X

Coordinated School Health Model

A SHAC should focus on the development of recommendations for improving coordinated school health policies and practices.

Currently Approved Programs

Texas law requires elementary, middle and junior high schools to adopt a coordinated school health program.

Approved for elementary schools:

- **Bienestar**
- **CATCH**
- **Great Body Shop**

The Ultimate Objective

By making data driven recommendations, a SHAC can have a profound impact on student outcomes.

**The only legal authority to adopt a local school policy is the school board.
SHACs can only make recommendations.**

Getting Policy Adopted

Five Basic Steps

Build Awareness and Support

- **Involve those effected by the policy**
- **Involve school health supporting organizations in the community**
- **Involve people from a variety of community groups.**
- **Anticipate, respond to, and involve critics**
- **Apply communication strategies as needed**

Lay the Groundwork

- **Clarify the need utilizing data**
- **Review the school board process for your school district related to making recommendations**
- **Explore programs to meet the need**
- **Develop recommendation(s) based on need and resources available**
- **Respect the process set out by the school board**

Presenting to the School Board

- **Present the policy recommendations to the school board.**
- **Use a well respected and known person to present a persuasive case.**
- **Support the school board in the decision-making process.**

Administer the Policy

- **This is largely the role of administration, however, SHACs can assist in developing implementation guidelines.**
- **Support the administration by providing positive community support.**
- **Ensure that the effort is maintained.**

A Word on Evaluation

Evaluation of the Recommendation

- **Set up the evaluation plan as you develop the recommendation**
- **Set out the processes needed to collect data along the way**
- **Seek assistance when needed in preparing the evaluation plan**
