

Personal Astrology Reading

A birth chart gives a snapshot of where the planets were at the moment of your birth. This planetary relationship of energies opens a deeper understanding of your unique cosmic blueprint mandala and how these energies can be expressed. When we interact with the elements in our chart, we can better navigate different areas of our lives, we can see how we naturally express ourselves and where there can be challenges to overcome and opportunities to lean in and have better ease and flow.

In this 90 minute private and confidential session you will receive a personalized birth chart reading with the main focus centered around your Sun, Moon, and Rising Signs, and a brief overview on the other planets. You will learn your chart signature and your primary elemental constitution.

My goal as an astrologer is to invite and inspire others to dive in and explore the depths of the cosmos and our connection to it. Through a better understanding of the whole, we can deeper integrate and work with the energies as they present themselves thus dancing with and cultivating peace within the habitat of our own zodiacal wheel and our relationship with it.

What astrology is to me:

weather, energy, music, a language, a relationship, a mirror, therapeutic, self improvement, a dance, divinity, embodiment.

As above, so below, as within, so without
