Connection goes from the water main to the property line (to be determined). Further installation of water is the responsibility of the property owner. If any plumbing issues arise at any point and a water meter becomes disconnected, it is the responsibility of the property owner to notify the water department prior to removal of the meter, and then again as soon as it is ready to be reinstalled. Any customer caught tampering with meter body/register or adding plumbing to avoid metered water will be subjected to penalty for theft of services. If at any point in time, the water department needs to gain access to your meter due to register failure, or suspicion, up to 24 business hours will be allowed before penalizing the customer according to the Town Ordinance (we obviously would need one).
