

Introducing Interlok “NO BOLT” Shelving System !

Made in North America

This versatile “No Bolt” shelving system is designed and manufactured with capacity, strength and flexibility in mind.

What offering our Interlok Shelving to your client will do ...

- Permits vertical and lateral expansions/additions thanks to a 16GA “T” Post that can be spliced up to 30 feet high
- Provides the right size shelf up to 4’ wide and 3’ deep
- Delivers strength and durability with a shelf that has 20GA lapped & locked corners, and a welded box structure
- Reduces labour costs to install or reconfigure by using shelf clips that are quick to install no matter how tall the system

Interlok Shelving System application for a distribution centre for tools and hardware products

Multi-tier system using Interlok Shelving customized for an auto parts and accessories distribution centre

The Interlok Shelving System includes components and accessories to meet all of your clients' storage needs including drawers, bin boxes, dividers ...
