

SoftWall Noise Partitions

SINCE 1875
SOPER'S
ENGINEERED FABRIC SOLUTIONS

800-263-8334 WWW.SOPERS.COM

Soper's SoftWall noise partitions are an effective solution to reduce industrial noise by separating the noise source from the rest of your facility. Whether you are isolating noisy operations or equipment, dividing an entire facility, or creating in-plant quiet areas, Soper's SoftWall noise partitions are an economical alternative to traditional rigid wall construction. Soper's fabric noise partitions are manufactured of high-performance noise absorption/barrier Fibreglass materials to provide you with optimum noise reduction.

BENEFITS:

- Prevent hearing loss by reducing noise in the workplace
- Improve employee health, safety, and comfort
- Reduce employee absenteeism caused by illness and stress
- Increase productivity

FEATURES:

- Manufactured of high-performance noise absorption/barrier fibreglass materials
- Tie in to existing walls and upper structure
- Panels attached using Velcro
- Flexible door and clear view window options

APPLICATIONS:

- Dividing an entire facility
- Segregating noise operations
- Sectioning off noisy equipment
- In-Plant offices and training areas
