

Subject: Urgent Request to Enact Arms Control Measures for Outer Space

CC: Space Governance Institute, Inc. (info@spacegovinst.org)

---

Dear [Title and Name],

I am writing to urge you to take meaningful and decisive action to enact and/or support arms control measures in outer space. As a concerned constituent, I believe that preserving outer space for peaceful purposes is essential to global security, scientific progress, and the well-being of future generations.

The increasing militarization of outer space poses serious risks. The deployment and testing of weapons and dual-use technologies in space threatens vital civilian infrastructure, including communications, GPS, position/navigation/timing (PNT), remote sensing, financial transactions, and climate-monitoring and weather systems that societies around the world rely on every day. Without strong national and international laws, and enforceable agreements and treaties, the likelihood of conflict and long-term damage in space will continue to grow.

I respectfully ask that you demonstrate leadership by enacting and/or supporting laws, regulations, policies and international efforts that:

- Call for and support an international convention to: negotiate, adopt, and ratify an international space arms control treaty before the U.N. Committee on the Peaceful Uses of Outer Space (UNCOPUOS)
- Prevent the placement or use of weapons in outer space
- Regulate dual-use technologies that pose a threat to space safety and security
- Promote transparency, confidence-building measures, and dialogue among nations
- Strengthen, amend, and/or update existing arms control agreements to address emerging space technologies that may pose a threat to space safety and security

While national security and the growth of commercial space are important, they should not come at the cost of destabilizing and threatening an environment that belongs to all humanity. Proactive arms control in outer space is not a sign of weakness; it is a responsible step toward reducing conflict and protecting shared global interests.

I urge you to act with foresight and responsibility on this issue. Your leadership can help ensure that outer space remains a domain of cooperation rather than confrontation.

Thank you for your time and consideration. I look forward to seeing action from you on this critical matter.

Respectfully,

[Your Name]

[City, State/Country]

[Optional: "Constituent" or Organization/School]
