### Scope of Service – Enterprise Project Control (25,000 m<sup>2</sup>+)

The Enterprise Project Control service is designed for major construction, infrastructure, logistics, and industrial developments requiring comprehensive aerial intelligence, advanced surveying capability, and ongoing temporary works oversight across complex operational environments.

This service delivers high-frequency drone monitoring, RTK and LiDAR-supported mapping, detailed operational reporting, and enhanced project visibility to support project leadership teams, construction managers, temporary works coordinators, and key stakeholders throughout all stages of construction.

Designed for large-scale and high-value projects, the service supports improved decision-making, clearer communication, enhanced safety visibility, and accurate digital records across multi-zone construction operations.

#### Service Includes:

- High-frequency drone surveys and aerial inspections
- Advanced RTK-enabled site mapping
- LiDAR-supported reality capture and 3D modelling
- Temporary works monitoring and oversight
- Progress tracking and construction sequencing visibility
- Multi-zone operational monitoring

- Logistics, access route, and laydown area analysis
- Monitoring of high-risk and high-activity operations
- Executive-level visual reporting
- Annotated imagery with identified risks, observations, and recommendations
- Stakeholder-ready reporting outputs
- Support for project coordination and operational planning
- Enhanced digital record keeping and historical site tracking

### Suitable For:

- Major data centre developments
- Large-scale distribution facilities
- Infrastructure and civils projects
- Manufacturing and industrial facilities
- Multi-phase commercial developments
- Complex high-value construction environments

### Deliverables:

- High-resolution aerial imagery and mapped visuals
- RTK-enabled survey and positioning outputs
- LiDAR-supported survey data and 3D site models
- Orthomosaic mapping outputs
- Executive progress and operational reports
- Annotated visual observation reports
- Historical progress tracking records
- Secure digital transfer of project data and outputs

### Site Size:

Projects approximately **25,000 m<sup>2</sup> and above**.

### Payment Terms

Invoices will be issued monthly in arrears.

Payment is due within **14 days of invoice date**.

Late payments may be subject to statutory interest and recovery costs under the Late Payment of Commercial Debts (Interest) Act 1998.

**Temporary Measures provides independent, structured Temporary Works coordination enhanced by advanced site visibility and compliance-focused reporting.**

**Our objective is simple: controlled delivery, reduced risk and demonstrable compliance.**
