Scope of Service – Integrated Site Intelligence (5,000 – 25,000 m²)

The Integrated Site Intelligence service is designed for medium-sized construction projects requiring enhanced operational visibility, temporary works oversight, and detailed progress monitoring across multiple work areas and project phases.

This service combines drone-enabled surveying, visual reporting, and ongoing site intelligence to support project teams in managing logistics, coordination, safety observations, and evolving construction activities. It is suited to projects with increased complexity, multiple subcontractors, and fast-moving operational environments where accurate visual data supports more effective decision-making and stakeholder communication.

Service Includes:

- Scheduled drone surveys and aerial inspections
- Progress tracking and visual reporting
- Temporary works monitoring and observations
- Logistics, access, and laydown area visibility
- Annotated imagery with identified observations and recommendations
- Monitoring of high-activity operational areas
- Stakeholder-ready reporting outputs
- Enhanced digital record keeping of site activities

- Support for identifying sequencing, coordination, and access constraints
- High-resolution imagery and mapped site visuals

Suitable For:

- Distribution centres
- Medium-scale industrial developments
- Commercial construction projects
- Manufacturing facilities
- Regional infrastructure works
- Multi-phase construction sites

Deliverables:

- Digital aerial imagery and mapped visuals
- Site progress reports
- Annotated observation reports
- Operational visibility updates
- Secure digital transfer of project data and outputs

Site Size:

Projects between approximately **5,000 m² and 25,000 m²**.

Payment Terms

Invoices will be issued monthly in arrears.

Payment is due within **14 days of invoice date**.

Late payments may be subject to statutory interest and recovery costs under the Late Payment of Commercial Debts (Interest) Act 1998.

Temporary Measures provides independent, structured Temporary Works coordination enhanced by advanced site visibility and compliance-focused reporting.

Our objective is simple: controlled delivery, reduced risk and demonstrable compliance.
