Scope of Service – Essential Site Visibility (Up to 5,000 m²)

The Essential Site Visibility service is designed for smaller construction projects requiring clear visual oversight, temporary works monitoring, and accurate progress tracking throughout the construction phase.

This service provides regular aerial inspections and site intelligence to support project teams with improved visibility of site activities, logistics, safety observations, and temporary works coordination. Using drone-enabled surveying and reporting, the service assists in maintaining accurate records of site conditions while improving communication between stakeholders and supporting informed decision-making.

Service Includes:

- Scheduled drone surveys and aerial photography
- Progress monitoring and visual reporting
- Temporary works observation and monitoring
- Site logistics and access visibility
- Annotated imagery highlighting key observations
- Digital records of site conditions and activities
- Support for identifying operational constraints and access issues
- High-resolution imagery suitable for stakeholder reporting

Suitable For:

- Small industrial developments
- Warehouse extensions
- Commercial fit-outs
- Minor civils works
- Short-duration construction projects
- Sites with limited temporary works complexity

Deliverables:

- Digital aerial imagery
- Site progress reports
- Annotated observations where required
- Secure digital file transfer of project outputs

Site Size:

Projects up to approximately **5,000 m²**

Payment Terms

Invoices will be issued monthly in arrears.

Payment is due within **14 days of invoice date**.

Late payments may be subject to statutory interest and recovery costs under the Late Payment of Commercial Debts (Interest) Act 1998.

Temporary Measures provides independent, structured Temporary Works coordination enhanced by advanced site visibility and compliance-focused reporting.

Our objective is simple: controlled delivery, reduced risk and demonstrable compliance.
