

"The coolest place in town where curious kids hang out and mess with technology."

Manifesto :

- Curiosity is more powerful than instructions.
- Technology should be explored, not just explained.
- The best ideas come from experimentation.
- Failure is simply another prototype.
- Anyone can become a Maker.

FREE WORKSHOPS FOR CREATORS AGES 8 to 18

To inspire Makers to explore technology through hands-on experimentation, creative problem solving, and collaborative discovery in a welcoming community where curiosity leads the way.
