

PLASTIC CHECKOUT BAGS

PLASTIC FACTS

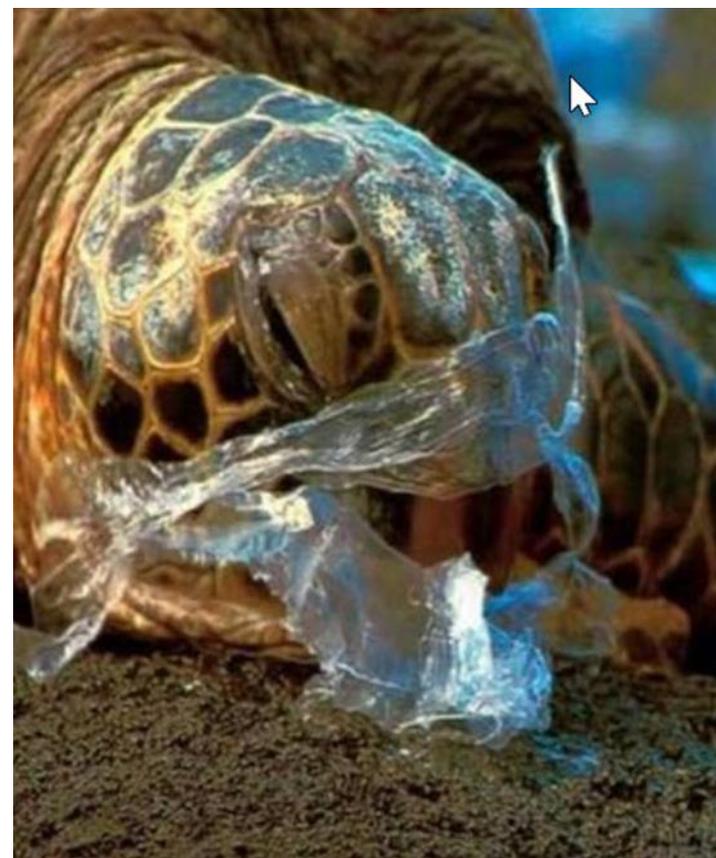

PLASTIC BAG FACTS

- Plastic Grocery bags (originally invented in Europe) were introduced in the USA in **1982** by Safeway & Kroger supermarkets.
- Americans use **100 billion plastic bags** a year, which require fossil fuels to manufacture.
 - Madison probably used over 6 million per year!
- According to Waste Management, only **1 percent** of plastic bags are returned for recycling.
- Plastic bags resemble jellyfish. **34%** of dead leatherback sea turtles had ingested plastic.
- Bags, when exposed to light, photo-degrade, becoming **microplastics** and continue to pollute the environment and enter our food chain.

Plastic bags are used for an average of 12 minutes but takes over 500 years to degrade in a landfill.

**THEN ON ONE
THURSDAY MORNING**

CURRENT CT STATE LAW

WHY IT IS NOT GOOD FOR THE ENVIRONMENT NOR MADISON

HB-07424 SEC. 355 – WHAT IT MEANS FOR CT & MADISON

State of CT

- August 1, 2019 : Retailers ... to collect a \$0.10 fee per single-use plastic checkout bag.
 - Plastic bags <4 mils thick
 - Paper bags and plastic “Product” Bags are excluded
- July 1st, 2021 – all plastic checkout bags are banned

	<u>FY20</u>	<u>FY21</u>
Est. CT Tax Revenues	\$27.7M	\$26.8M

Madison	<u>FY20</u>	<u>FY21</u>
Est. CT Tax Revenues	\$0.66M	\$0.6M

WHAT'S WRONG WITH THE STATE LAW?

Two Things:

1. The “fee” is a tax that goes back to the **General Fund** and NOT to a “protected” Environmental Fund
2. This “Tax” will encourage a greater use of “*free*” Paper Checkout Bags which are just as detrimental to the environment as plastic.

HB 07424 is not good for the Environment nor Madison

PAPER OR PLASTIC?

When asked this question at checkout, the correct answer is Neither.

Bring Your Own!

Paper Bags

- Requires 14 million trees to be cut down annually
- Requires thousands of gallons of water to create 1 ton of pulp
- Requires fossil fuels to transport
- Have twice the carbon footprint as plastic
- Are biodegradable in compost but **NOT** in a landfill

Plastic Bags

- Litter prone and clog storm drains
- Endanger wildlife
- Break down into microplastics that end up the food chain
- Are manufactured from fossil fuels
- Are detrimental to recycling systems, causing jam ups.
- Are NOT biodegradable and will last centuries in the environment

When considering litter and its impact on marine life and the food chain, from the environmentalist's view, PAPER is the LESSER of TWO EVILS.

ORDINANCE PROPOSAL

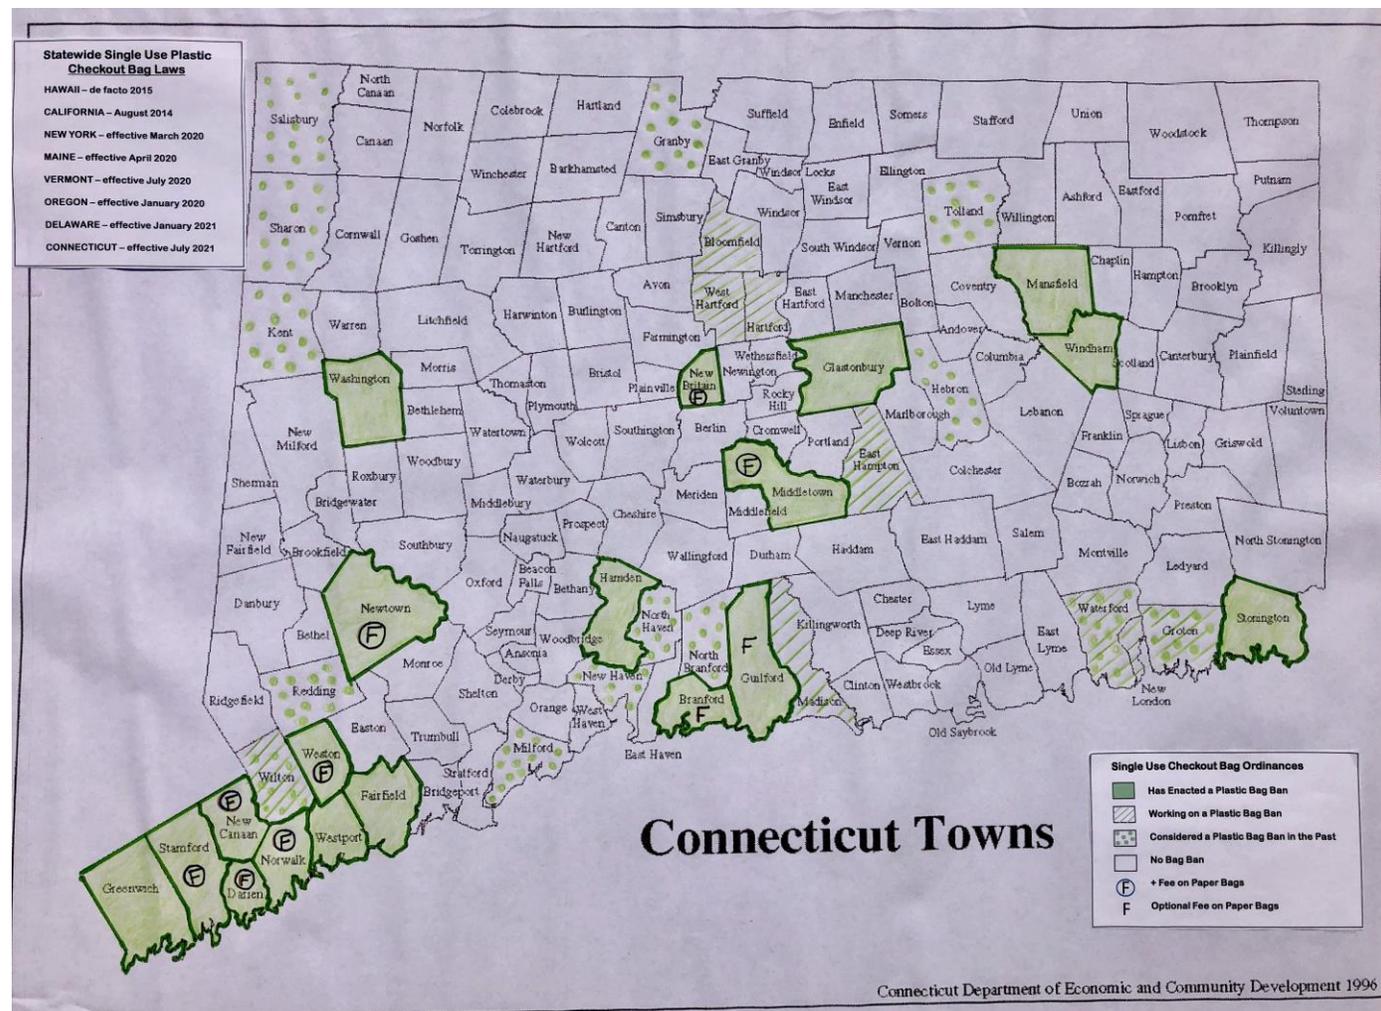

DETAILS, COMMUNITY SUPPORT, EFFECTIVENESS

WE ARE NOT ALONE!

- By 2021 – there will be **8 US States with Plastic Bag Bans (all with paper bag fees)** in effect: **Hawaii, California, New York, Maine, Vermont, Oregon, Delaware and CT.**
- In Connecticut - there are **19 municipalities with Plastic Bag Bans (10 with paper bag fees).**

MADISON

BANS WORK !!**

**BANS WITH PAPER
BAG FEES ARE MUCH
MORE EFFECTIVE**

Post Ban Effectiveness Studies

Hybrid Ban

1. Richmond, CA (2014/16) – plastic ban plus **5 cent** (2014) then **10 cent** (2016) on paper; **reusable bag usage up to 70%**, people using no bags jumped from 5 to 30%.
2. Aspen, CO (2018) - plastic ban plus **20 cent** (2012); a study showed **15% of shoppers bought paper bags**, 45% used no bags, **40% brought reusable bags**.

Straight Ban

1. Westport, CT (2010) – plastic bag ban only, no paper fee; survey showed customers used **50% reusable bags**, **roughly 45% paper bags**, and 2% used no bags at all.
 - ❖ **Comparing similar stores, the ban-only ordinance increased the use of paper bags dramatically.**
