

Why Choose Alpha-Stim?

- Non-drug, FDA-cleared medical device
- Clinically proven, patented waveform
- Easy-to-use, portable, and painless
- Fast acting, long-lasting, cumulative relief
- No risk of addiction or lasting side effects

How Does it Work?

Alpha-Stim is a medical device that restores natural balance to mind and body using a painless, electrical microcurrent. It uses cranial electrotherapy stimulation (CES) applied via earclips on your earlobes or microcurrent electrical therapy (MET) using smart probes placed at the site of your pain. The patented waveform used allows your body's cells to return to their normal functioning state.

Is Alpha-Stim Safe?

Yes! Over 100 clinical studies prove the safety and effectiveness of Alpha-Stim. These studies were conducted independently, and all used the Alpha-Stim device specifically.

Less than 1% of people experience side effects, including headache and skin reaction at the electrode site. There are no lasting side effects and no risk of addiction.

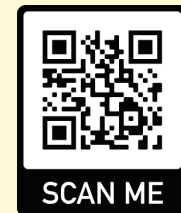

How Effective is Alpha-Stim?

On average, Alpha-Stim is effective for 9 out of 10 people.

What Should You Expect?

Alpha-Stim treatments can be done in the comfort of your own home while doing normal, everyday activities. A probe treatment for pain takes 2-5 minutes, while a treatment using the earclips typically takes 20 minutes. Relief is often immediate. Treatments are cumulative and while we suggest daily treatments until you have a noticeable decrease in symptoms, they can be done 2-3 times a week for maintenance or as needed. For best results, most people do their treatment at least 3 hours prior to bedtime.

Anxiety reduction is usually experienced during a single treatment and may last for hours or days thereafter.

Insomnia is usually improved after the initial treatment but may take up to 4 weeks to see a significant change. It can also be used when awakened during the night.

Depression typically takes at least 3 weeks or more of daily treatment to experience significant improvement.

Pain relief is usually experienced immediately, but pain may continue to diminish hours after treatment.

Select the Alpha-Stim That's Right for You

Alpha-Stim technology is available for home use in two easy-to-use devices.

Alpha-Stim M

- Pain
- Anxiety
- Insomnia
- Depression

Alpha-Stim AID

- Anxiety
- Insomnia
- Depression

How Do You Get an Alpha-Stim?

In the United States, you must obtain an order or prescription by a licensed healthcare practitioner. Once you've obtained this, you can buy a device 3 easy ways:

- Shop online at alpha-stim.com
- By phone at 1-800-FOR-PAIN (in the USA)
- Email or fax a retail order form (downloadable from alpha-stim.com)

Alpha-Stim comes with a 5 year limited warranty, along with free technical and clinical support.

Looking for a better way to relieve pain, control anxiety, fight depression or treat insomnia?
