February 2021

St. Petersburg Shell Club, Inc.

Web site: stpeteshellclub.org

Shell Club meetings are held on the first Friday of the month, except June, July and August, at the **Seminole Recreation Center, 9100 113th Street North, Seminole**. The doors open at 6:30p.m. and the meetings start at 7:00 p.m. The public is always invited. **Due to the covid-19 pandemic, meetings will be held via Zoom jointly with Suncoast Conchologists until further notice.**

Ditropopsis biroi (Soós, 1911) Mount Sapau, West Sepik Province, Papua New Guinea, 4mm, pic by John Slapcinsky (Florida Museum of Natural History, Gainesville, Florida)

Fossil cephalopods such as ammonites do not hold a monopoly for having heteromorph shells. There are living gastropods, both marine and land, which exhibit this trait. The tiny shell above is a reminder of nature's spectacular variability and wonder, and why so many are fascinated by the Mollusca.

A MESSAGE FROM THE DESK OF YOUR PRESIDENT

Despite not having any live shell shows in Florida, I hope you all are taking advantage of some of the varied virtual programs that are available from many organizations. Our club and the Suncoast Conchologists have been holding joint Zoom meetings. By the time you receive this, I will have presented four programs this way; two for our clubs, one for the Sarasota Shell Club, and one for the Broward Shell Club. Many times, these talks from other groups are recorded and can be accessed later via their web site or YouTube channel. There are many varied webinar programs presented by organizations such as NOAA, Tampa Bay Fossil Club, museums, and aquariums. The beauty of these is that you don't have to drive anywhere.

Due to low dealer and volunteer participation, the Tampa Bay Fossil Club has reluctantly canceled their annual Fossil Fest scheduled for March. This is the largest fossil show held in Florida, and the second year in a row it had to be canceled. And the North Carolina Shell Club has canceled their shell show due to the pandemic; it was scheduled for May.

Despite nearly 40 million people getting their vaccinations, the battle is not over yet. Some people continue to ignore safety precautions or believe the false info that the pandemic is not real. We all need to maintain our vigilance if we ever want to return to as normal a life as possible. I look forward to the day when we can all shake hands or hug each other again.

Please be safe, my friends. Wear masks, clean your hands, and observe social distancing. Hang in there, everyone.

John

April—Coquina shell (*Donax variabilis*)

May—Emerald nerite (*Smaragdia viridis*)

THE SHELL COLLECTOR'S CODE OF ETHICS

I realize that molluscs are part of our precious national wildlife resources, therefore:

I WILL make every effort to protect and preserve them not only for my own future enjoyment, but for the benefit of generations to come.

I WILL always leave every shelling spot as undisturbed as possible.

I WILL take only those specimens needed for my collection and for exchange at the time... Shells in a box cannot reproduce while I am waiting for a place to send them.

I WILL leave behind the damaged and the young specimens so that they may live and multiply.

I WILL NOT collect live egg cases unless they are to be used for study, and then, only in small quantities.

I WILL NEVER "clean out a colony" of shells.

I WILL practice and promote these conservation rules in every way possible.

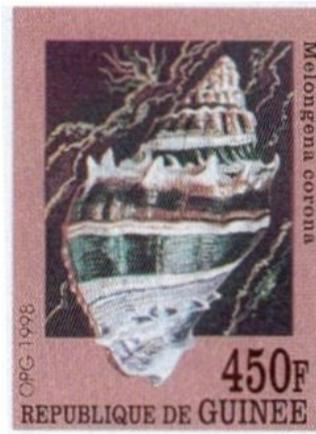

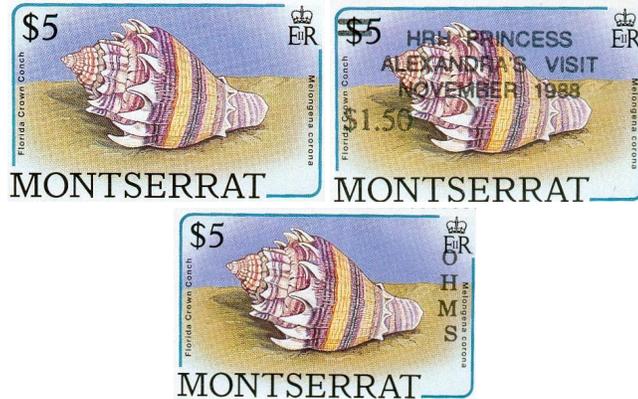

Molluscs on Stamps

by John Jacobs

While there are thousands of stamps from around the world depicting various molluscs, sometimes even the more common varieties haven't been depicted or there are very few stamps showing them. This is the case for our club shell *Melongena corona* (Gmelin, 1791) (King's crown/Crown conch). Shown here are the only stamps I've found depicting our club shell.

Guinea, located in west Africa, issued this stamp and souvenir sheet in 1998, which is interesting since *M. corona* is a Florida/Caribbean species. It is not unknown for countries to issue stamps depicting subjects that have nothing to do with that country. Regardless, it is a nice depiction, and they got the species name correct.

Montserrat, an island in the Caribbean under British control, issued a stamp in August 1988 with a colorful depiction of the shell. It was reissued in November 1988 with an overprint for the visit of Princess Alexandra and a surcharge changing the value from \$5 to \$1.50. In May 1989 the stamp reappeared with the overprint OHMS (On Her Majesty's Service), making it an official mail stamp.

Guinea-Bissau, west coast of Africa, issued this sheet in 2017. The fifth stamp shows a sinistral *M. corona*. The 1st stamp with *Strombus alatus* is also shown sinistral. Artistic license, I suppose.

A live *Melongena corona* September 26, 2003. South rest area Sunshine Skyway Bridge. Photo John Jacobs

Field Trips North Sunshine Skyway Rest Area

Story & pics by John Jacobs

January 13th saw a small group of four ready to brave the wilds of the north rest area to the Sunshine Skyway Bridge. We had a nice -0.6 low tide, very light breeze, and temperature in the 50s, making for a pleasant morning. I haven't done this end of the Skyway much, so I was very happy to go there.

The mud here is softer than at the south rest area, so one must be aware that your foot can sink a few inches. Having footwear that is snug on your feet is recommended. Access is easy here as you can see in the photo.

Asterias forbesi

Cerithium muscarum

Ceriantheopsis americana, tube anemone

Dinocardium robustum siphon pair

Ficus papyratia

Thyonella gemmata, striped sea cucumber

Vokesinotus perrugatus

New ammonite
John Jacobs

A newly described heteromorph ammonite from Hokkaido, Japan was discussed in the journal *Paleontological Research*. The above illustration of a live animal was created by Masato Hattori. Some of the actual specimens are shown below. A 23.5mm 10 yen coin is used for scale in the museum display.

Ref: Yusuke Muramiya and Yasunari Shigeta. 2020. "*Sormaites*, a New Heteromorph Ammonoid Genus from the Turonian (Upper Cretaceous) of Hokkaido, Japan" *Paleontological Research* 25(1), 11-18, (30 December 2020). <https://doi.org/10.2517/2020PR016>

Conchologists of America, inc.

Conchologists of America 2021 Convention

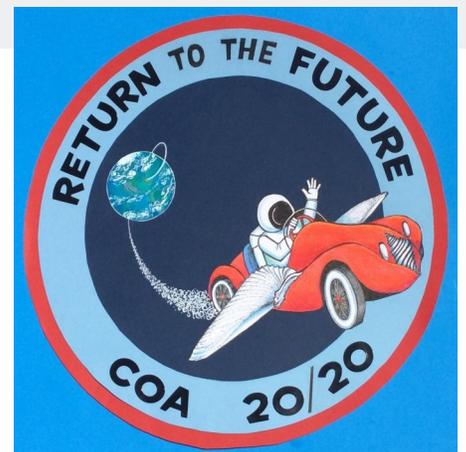

Due to the Covid-19 pandemic, the planned conventions have all been delayed by a year. Here is the next scheduled convention.

When: June 14-20, 2021

Where: Hilton Hotel, Melbourne, Florida

To attend the convention and participate in the presentations, field trips, and silent auctions, you must be registered. Registration forms should be available soon.

The convention consists of several pre-convention field trips, the Welcome Party, presentations/talks, silent auctions, the Banquet, an oral auction, and the dealers bourse. No registration is required to attend the oral auction and the bourse. The bourse normally consists of about 10,000 square feet of space for dealers from around the world displaying a huge variety of shells and shell-related items.

MEMBER NEWS

If you would like your picture in the Directory. Ask John to take it or send us one. Got a shell question???

Send me an email. I will try to answer it in the Tidelines.

Show 'n Tell

Bring that special shell to the meeting and talk for a few minutes about it. What was it that appealed to you about that specimen? Was it the color, the family, the location it came from?

Do you have a question on the identification of a shell? Whatever the reason, blow your horn, show it off.

HAVE I RENEWED ?

Our club membership runs from January to December. If you are not sure if you have renewed, call or email us.
