

How to properly care for your quilt so that it lasts a really long time

The worst thing you can do for your quilt is to put it in a closet or keep it tucked away from the world! Your quilt was created to be used & enjoyed! Snuggle under it & let your worries fade away. Every single stitch has love in it!

The best way to keep a quilt fresh & the fabric bouncy & non-stuffy smelling is to USE it!

To prevent the colors in the fabric from bleeding. It is recommended to use a Shout Color Catcher while washing. You can find these in the detergent aisle or on Amazon

Disregard the quantity recommended on color catchers box. Annie's suggest using 1/2 of the box per quilt you wash!

Hand Washing Instructions

- Use a large tub filled with cold water only!
- Never use bleach! Use gentle hypoallergenic detergent.
- Submerge your quilt. Agitate gently for 10 minutes.
- Drain the soapy water. Refill with clean, cold water.
- You can add 1/2 cup distilled white vinegar to your water. This clears the quilt of any detergent residue.
- Keep rinsing with cold water until the suds are gone.

Machine Washing Instructions

- Use Only "Gentle" or "Delicate" Cycle
- Cold Water Only
- Never use bleach! Use gentle hypoallergenic detergent.

Drying Instructions

- Quilts are happiest (and fluffiest!) When they can air dry. However, you can put them in the dryer on a delicate setting until they are mostly dry and then lay out to air dry.
