

ENVIRONMENTAL & SUSTAINABILITY POLICY

TEK Engineering is commitment to supporting the principles of environmental sustainability and recognises that a sustainable environment is central to our organisation and the lives and work of our employees. We aspire to minimise the impact of our business operations on our environment and believe that by maximising the effective use of resources this will reduce the impact of environmental risk on our organisation.

GUIDEING PRINCIPLES:	OUR COMMITMENT:
Continually reduce life-cycle environmental impacts as an enabler for increased sustainability and customer success;	Meet all relevant legal and legislative requirements relating to environmental sustainability and other compliance obligations;
Demonstrate responsible care for the environment and build trust with our customers and the communities in which we operate;	Promote responsibility for the environment within the organisation across all levels within the workforce;
Minimize resource use, emissions and waste and, by utilizing means within our sphere of influence, create change towards a circular economy and to further improve our competitiveness.	Communicate to management, employees, contractors and suppliers their responsibilities so that all are aware of their individual obligations.
	Provide adequate resources to meet our commitment to this policy and the environment;
	Reduce our organisation’s use of energy, water and minimise the generation of waste by appropriate re-use and recycling methods where possible.
