PlayBox Technology Announces the Launch of New Channel In A Box

=====

PlayBox Technology UK Ltd is excited to announce the launch of its new Channel In A Box, which is most up to date engine from industry leader PlayBox Technology (UK), built around today's Automated workflows for OTT and IP Broadcast. The new Channel In A Box will speed up your workflows whether it's SDI or IP and increase your return on investment and offer you greater flexibility of operation style.

The official launch date for the new Channel In A Box is 7th December 2018.

PlayBox Technology (UK) believes that Channel In A Box will offer far fast speed for putting channels on air with ease and will offer HTML5 graphics for the first time from PlayBox.

Channel In A Box offers a gateway from which new channels can be established with relative ease and efficiency, regardless of whether you are looking at traditional broadcast, web based or OTT services.

Customers globally have benefited from the flexibility of operation, which is a direct result of the automated approach that PlayBox has pioneered for the last 14 years.

Product is an update driven by customer feedback and is part of PlayBox Technology's commitment to deliver the latest product updates in one convenient installation. Product is available for immediate demonstration at
