Yousif Hassan
Leader and Product Manager
EAI Technologies
1945 Old Gallows Road, Suite 310
Vienna, VA 22182

Yousif Hassan;

My name is Raul Chevalier, and I'm interested in applying for the Entry Level Software Developer position at EAI Technologies. With software development, there is always something new to discover. Designing Web and Mobile applications for Cyber Security, Supply Chain/Logistics, or Finance that are truly helpful to the user is my dream job, and I am delighted by the opportunity to apply my knowledge at EAI Technologies.

I'm currently a student at the University of Louisville and will earn my Bachelor of Science in Business Administration in December 2022. I chose a major in Computer Information Systems with emphasis on Information Security. My goal as a Software Developer is to continually increase my programming skills to present better solutions to my employer and its valued customers.

During my IT internship at Colegio Brader in Panama, I worked with a team of 5 developers in charge of analyzing user needs and software requirements to implement an online tool for staff tracking and contact tracing during the Covid-19 pandemic. As part of my duties, I interviewed main stakeholders, and designed and tested the required forms to feed the tracking database. The implementation of the online tracing tool resulted in a 25% faster data collection and easier analysis of raw data for required reporting to local authorities.

Thank you for your time and consideration. I'm looking forward to learning more about the Entry Level Software Developer position and about EAI Technologies. You can reach me at your convenience by email via racheva99@gmail.com.

Sincerely,

Raul Chevalier
