Sample ID	Notes	Test Code

Test Type		Test Code	Price
Soil Biological Test	Full Biological Analysis (based on the Soil Food Web) gives a detailed look at the active biology in your soil. Results of this analysis include F:B ratios, and biomass of bacteria, fungi, protozoa and nematodes. It also reveals the presence and populations of detrimental species. Includes 10 minute follow-up call to clarify or answer any questions regarding test results.	SBT	\$150
Biological Survey	Biological Survey gives a look into the biology present in your soil. Results of this analysis include F:B ratios, and presence or absence of protozoa and nematodes. It also reveals the presence and populations of detrimental species.	BioS	\$35
Biological Quick Peek	Biological Quick Peek is a visual assessment of Soil Food Web organisms during a 20-minute video session with client. This is not a count, nor a scientific assessment of the soil.	BioQP	\$55
