Few of the features that our customers really appreciate

What It Does?

Regulate & Control

- Mail Moderating: User/group/global level rules and exception lists.

- Mail Size Filtering: Set mail size permissions per email account.

- Anti-virus & Anti-spam: Powerful gateway level attachment control and analysis of spam patterns.

- Web security: User based URL and File filtering.

- BCC discovery: Ability to monitor 'bcc' mails and block sending and/or recipient.

- PM to PM delivery notification: Ensure prompt propagation of communication and eliminate instances of miscommunication.
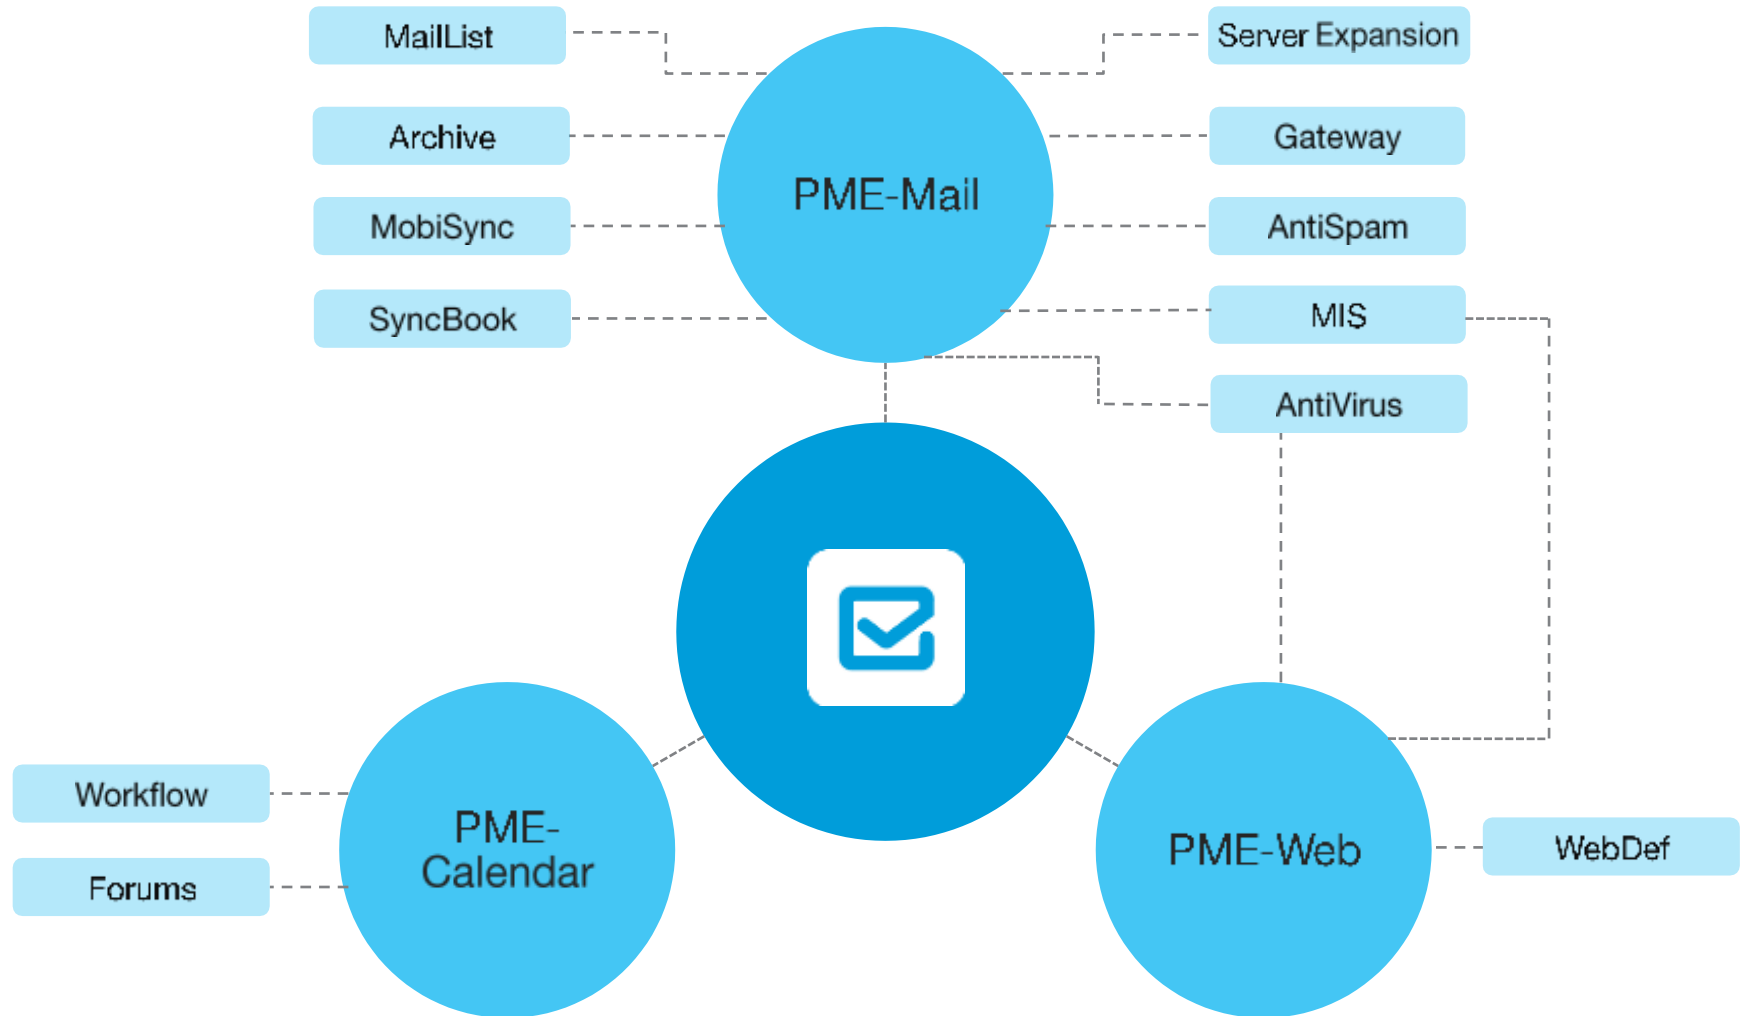

PostMaster
ENTERPRISE

Standardization

- Smart Auto-responders: Customized automatic responses in case of user being unreachable due to unavoidable circumstances.

- Address Book support: Global, Local and Personal Address Book support.

- User statistics: Detailed logging and reports with log rotation.

- MIS Reports: Intelligent reports to aid analysis and decision making.

- Automation: Disclaimers and other standard text is automatically injected into every message.

PostMaster
ENTERPRISE

Automation & Self-healing

- Centralized archiving: Ensure zero mails loss.

- Robot rules: Define rules for all incoming/outgoing mails.

- Calendar and Workflow: Collaborate and standardize processes.

- Incremental self-upgrade: Self diagnostics of vital system parameters and undertaking appropriate self healing.

- Other automations: Scheduled backups, live alerts and shutdown.

no worries.
