

# OMSEMBLE

nourish · restore · evolve

## **Immersive Sound Experiences for Conferences, Retreats, and Group Events**

OMSEMBLE offers immersive sound experiences designed for hotels, resorts, and event centers seeking distinctive, high-value wellness programming for conferences and group events. Led by a board-certified physician and an experienced sound practitioner, OMSEMBLE Sound Journeys help attendees pause, reset, and return more focused and engaged.

## **What Is an OMSEMBLE Sound Journey?**

An OMSEMBLE Sound Journey is a guided, immersive listening experience that allows participants to rest and mentally recharge. Using carefully curated sound created from gongs, singing bowls, handpans, subtle electronic soundscapes, and gentle vocal tones, participants are invited to sit or lie comfortably and simply listen. No prior experience or preparation is required.

## **Why Sound Works for Conferences**

Conferences and professional gatherings are often information-dense and mentally demanding. Research in neuroscience and stress physiology shows that intentional sound environments can reduce perceived stress, support nervous-system regulation, and improve focus and clarity without adding complexity to event schedules.

## **Ideal for Hotels and Event Centers**

OMSEMBLE Sound Journeys integrate seamlessly into corporate conferences, leadership retreats, professional association meetings, healthcare and caregiver events, reunions, family gatherings, weddings, and client appreciation programs. Sessions are easy to host, inclusive, and adaptable for small or large groups. We can create custom messaging to add a special touch.

## **What Participants Are Saying**

“Sound healing for me is a place to be present, removing the busyness of my mind with healing sound.”

“A unique, enjoyable experience — like a meditation with beautiful sounds.”
