

Size guide

To ensure our products fit your dog perfectly, use a soft tape measure to obtain the measurements of your pet around their chest and neck.

The weights provided are an approximate guide and are not an accurate reflection of dog weights compared to the measurements as every dog is different. Remember, our products are adjustable due to the velcro fastenings and/or clasps.

If your dog is between sizes, it is recommended to size up for comfort.

Please note: it is common for your dog to wear a different size across products. For example, a collar in size 0, a harness in 1 and a raincoat in 2.

Size	Best for	Chest (CM)	Neck (CM)	Weight (approx)
XXS	<i>Teacup, toy puppies</i>	23-28	18-22	Under 2.2kg
XS	<i>Small toy breeds</i>	27-34	22-27	2-4kg
S	<i>Slightly fuller toy breeds or small breeds</i>	33-40	27-32	3.5-6kg

Size XXS – Designed for toy breeds in their earliest stage of life or very slender frames on adult dogs.

Size XS – A tailored everyday fit for most toy breeds. Designed for small, balanced frames once they've grown past their très petit stage.

Size S – Created for fuller or slightly longer hair toy breeds or small breeds to fit over their fluff.
