

OBS + TWITCH STREAM INSTABILITY TROUBLESHOOTING

Version 1.2 | Modified 15.03.18

Do a **Twitch Bandwidth Test** for at least 5 minutes after completing an action in a green box to see if your issue has been resolved or if it has at least improved. Proceed until desired result achieved or until end of tree reached - you don't have to go to the next item if the last one you tried works. Run the bandwidth test as if it were a full stream
