Foldable book template google docs

Are you a budding novelist? If so, you don’t need to splash out on Office. Learn how to make a book in Google Docs right here. Google Docs is a free and surprisingly powerful online word processor. It comes with a range of ready-made templates for common document types, including resumes, letters, project proposals, and class notes.If you’re looking to write a book in Google Docs, however, then there aren’t any suitable templates to use. Thankfully, it’s fairly simple to set up your own template if you’re looking to write a novel.If you want to know how to make a book in Google Docs, here’s what you need to do.Configuring Page SettingsBefore you can start writing your book, you need to configure your page settings so that it’s set up to look like a novel. The first step is to create your document and tweak some settings.Here’s what you need to do:Navigate to the Google Docs webpage in your browser.Sign in to your Google account.Under Start a New Document, click on the Blank template. Once your new document has opened, click on File > Page Setup.Choose your page options. For most book templates, you should select Portrait for the Orientation, Letter for the Paper Size, and ensure that Pages is selected.Click OK when you’re done. Click on the Font dropdown at the top of the page, and choose your font. Times New Roman is a common font used for many books. Set the font size to 11 or 12. You can use the plus and minus buttons, or just type the font size into the box. Create a Title Page in Google DocsNow it’s time to create your title page for your novel. This will be the first page that anyone sees from your book.To do this:Make sure your text is center-aligned by clicking on the Center Align icon. Type the title of your book.Press Enter twice, then type your name.Highlight the title of your book, then click on the Styles dropdown that should currently read Normal TextScroll down to Heading 1 then click on Apply ‘Heading 1’.

Your book title will now appear as a large heading on your title page. Rename Your Document in Google DocsThis is a good time to name your document. The reason that we’ve waited until this point is that Google Docs will generate a file name for you from the first content in your document, which saves you from having to type it out.Here’s how it works:Click in the document name field, which should currently read Untitled Document. The field should automatically populate with the title of your book. If you want to use a different name for your document, you can type it in here.Create Your First Chapter in Google DocsYour title page is done, and your document has been named. Now it’s time to create your first chapter.These are the steps:Click at the end of your name on the title page.Press Ctrl-Enter on Windows or Cmd-Enter on Mac to create a page break. This ensures that your first chapter starts on a different page to your title page.Type the name of your chapter.It’s important to use a heading rather than just writing your chapter title in bold font, as it will help when it comes time to create a table of contents. Highlight your chapter name, and click on the Text dropdown.This time, scroll down and then click on Heading 2. If you want to, click on the Center Align icon, to put your chapter title in the middle of the page. Click at the end of your chapter title, and then press Enter to start the first paragraph.Start writing your chapter. When you finish your chapter, repeat steps 2-7 above to create the next chapter.Configuring Headers and Footers in Google DocsNow that you’ve got some pages written, you’re going to need some page numbers for your book. We can add these in by using headers and footers.Here’s how: Click on Insert > Headers & Footers > Header. Type the name of your book. If you want this to appear centrally, click on the Center Align icon. If you scroll to the top of your document, on the first page you will see a Different First Page checkbox. Ensure this is unchecked so that the header doesn’t appear on your title page. Now click on Insert > Headers & Footers > Footer.Click on the Options dropdown and then click on Page Numbers. Uncheck the Show On First Page checkbox if you don’t want a page number on your title page. (It looks much better without one).
Click Apply.
Click anywhere in the main body of the document. You should now see your page header and page numbers on every page except the title page.Create a Table of Contents in Google DocsThe final step is to set up a table of contents. This is why we made all of our chapter titles H2 headers rather than simply bold text: Google Docs will now create the table of contents using those headers.This is how it works:Click at the end of your name on the title page, and press Ctrl-Enter on Windows or Cmd-Enter on Mac to create a page break. This will insert a new page for our table of contents.Click Insert > Table of Contents and select whether you want your table of contents to include page numbers, or just be made up of links to each chapter. Your table of contents will now be created. When you add more chapters, you made need to update your table of contents. To do so, click on it, and then click on the Update Table of Contents button. Create a Book Template in Google DocsIf you’re planning to write more than one book, then we definitely recommend saving a copy of your document that can use as a template for other books.These are the steps:Click on File > Make a Copy. Name your template and click on Make a Copy. Strip out any of the chapter text, but leave the chapter headings; you can just overwrite these when you write a new book, and it saves having to set up the formatting again.Now when you want to create another book, just open your book template, and click on File > Make a Copy to create a new document. That way, your template will always remain unaltered.Get The Most Out of Google DocsThere aren’t many word processing tasks that can’t be done in Google Docs. Now that you know how to make a book in Google Docs, there’s plenty more to learn.It’s simple to share your documents if you want to collaborate, and you can even set an expiry date for shared documents so that people can’t access them indefinitely. If you’re worried about it being an online app, it is possible to work offline with Google Docs if you know how.If you still can’t quite let go of Microsoft Office, you can also export Google Docs to Microsoft Office format. Booklets are a fantastic way to put information and can be used in many different fields. A booklet is a small book with fewer thin pages that are designed to hold information about something specific. Booklets usually have very colorful and attractive designs with lots of images to make them easier to read. This can be hard to design and make on your own, and many people would rather hire a professional to do it, which is why in this article, we’ll help you figure out how to make a booklet in google docs.
We’ve also included some booklet templates that you can use. How to Create a Booklet in Google Docs Open a Blank document Go to Page Setup and choose the appropriate size for your booklet. Create the cover page with the title Add the text in your Insert the images Format the booklet.
Types of booklet templates in google docs There are plenty of different types of booklet templates suitable for different situations. Here are some of the most common types of booklet templates: Brochures: Brochures are commonly used for advertising a specific product or service. They are a user-friendly option that lets people learn about the product or service in question and are common in many industries.
A good example is a university brochure that has information on all the available courses. Instruction Manuals: These are booklets that are usually found together with new devices or equipment. They have information on how to set up and use the specific equipment as well as things you should be careful with and things you should avoid. Event program: Some events also use an event program in the form of a booklet to provide information about a specific event, such as a conference, concert, or festival. The booklet usually contains information such as the time for each event, the performers or panel and their background and background of the event. Cookbook/Recipe booklets: These are booklets that provide recipes and cooking instructions for different meals. Catalogs: These are image-focused booklets that are used to display different designs and products offered by a store. They usually contain images of the product with a short description and are commonly used in fashion and interior design. Portfolio: A portfolio is a booklet that showcases your work, such as your art, writing, or photography.
The portfolio booklet can accompany your resume when you’re filling out job applications.
Newsletters: News; letters come in many different forms, and one of them is a booklet. They are used to keep people informed about a specific topic or event. How to Make a Booklet in Google Docs Making a booklet in Google Docs is a straightforward process. Follow these steps to create your own booklet: Step 1: Open a new document Open Google Docs and create a new document. Click on “File” and then “New” to create a new document. Step 2: Set up your pages Go to File> Page setup.

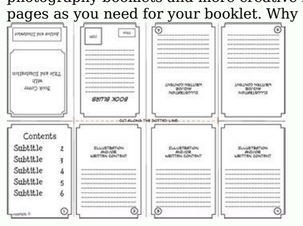

Choose a paper size Select the orientation You can also choose a page color.

Step 3: Create your cover page Add the title of your booklet Format it and change its alignment to fit the booklet. Step 4: Design shape elements Booklets usually have a consistent design in all the pages. You can add designs using the draw function in Google Docs: Go to Insert > Drawing and choose New. Click on the shape icon and choose a shape. Hold and drag the cursor on the canvas to add shapes. Change the color of the shapes Click save and close. When adding these designs be careful of the header section. If The image gets past the header then it will appear in all your pages. Step 5: Align the shape designs After you’ve designed your shapes you need to align them: Select the image. Go to Image options. Click on the Text wrap drop down. Choose how you want the image and the text to interact. The best option is behind text so that it doesn’t affect your text.

Move your image by clicking and dragging it. Step 5: Add your content Now you can start creating your content. Add text, images, charts, or any other elements you want to include in your booklet. Make sure to keep the overall design and layout consistent throughout the document. Step 6: Add Images Now you can add any relevant images to your booklet. We recommend you do this after adding the text in your booklet so that you can make sense of your layout. Click on the image icon in the toolbar and choose where you want to upload your image from. Step 7: Format your Booklet Once you have added all the necessary information in your booklet you can change the font and layout as you wish. You can also add page numbers: Go to Insert > Page number. Choose the position for the page numbers. And there you have it – a simple guide to creating a booklet in Google Docs. With these steps, you can create a professional-looking booklet that is perfect for a variety of purposes, from marketing and promotion to informational and instructional materials.
