

A new hot tub should be exciting — **not full of surprise costs.**

9 quick questions every homeowner should ask **before** buying a hot tub.

Based on the 2024 Ontario Electrical Safety Code (29th Edition)

Thinking about a hot tub? Here's our advice.

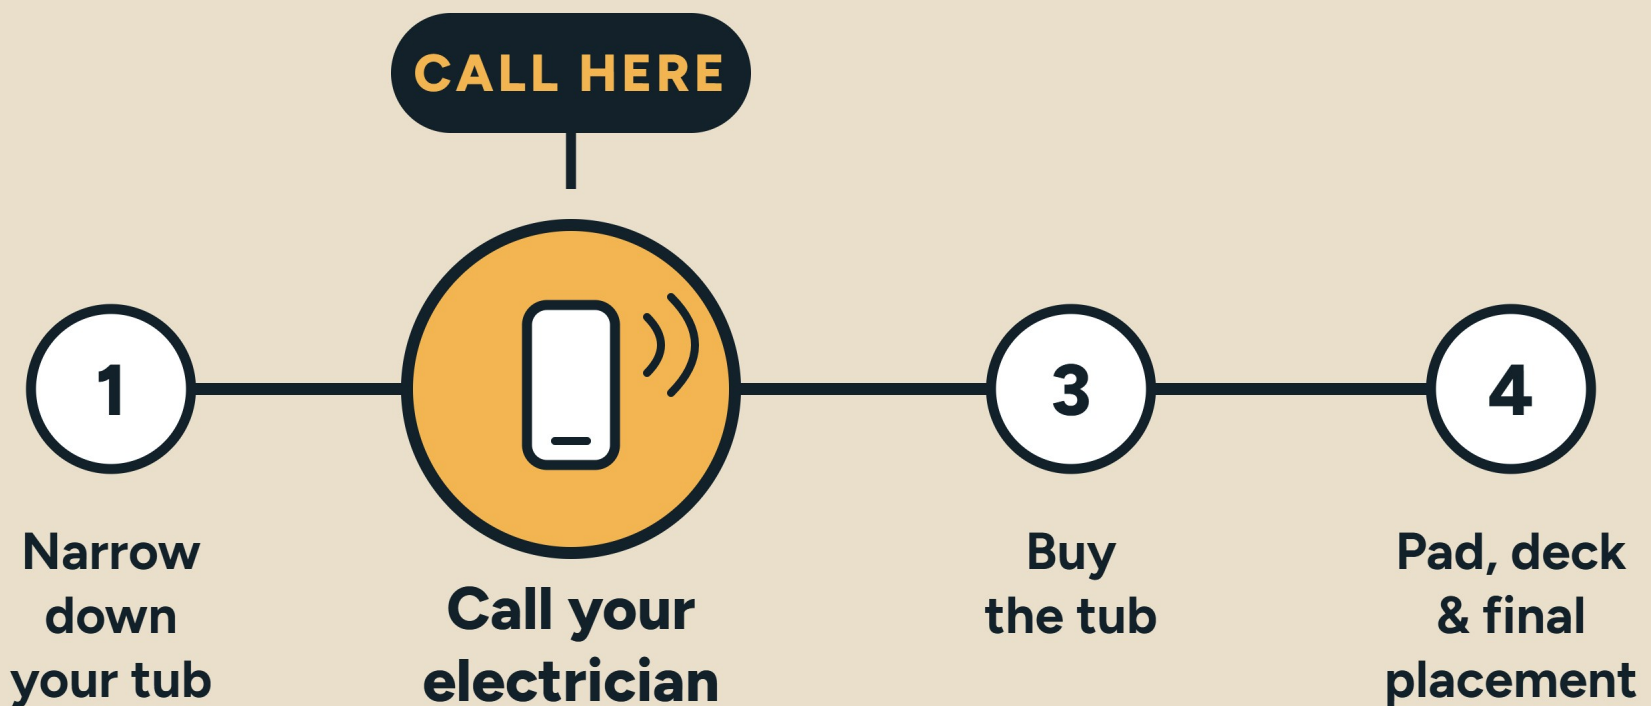

YOUR PROJECT

Hot tub	✓
Electrical	?
Concrete pad	?
Decking	?
Permits	?

TOTAL **???**

Enjoy it — this should be an exciting project! Just plan the whole thing up front, so **no surprise costs show up after decisions are already made.**

When should I call my electrician?

As soon as you've narrowed down the tub you want.

The specific tub matters — so bring us in before you buy, before concrete or decking, and before final placement.

Call before you buy →

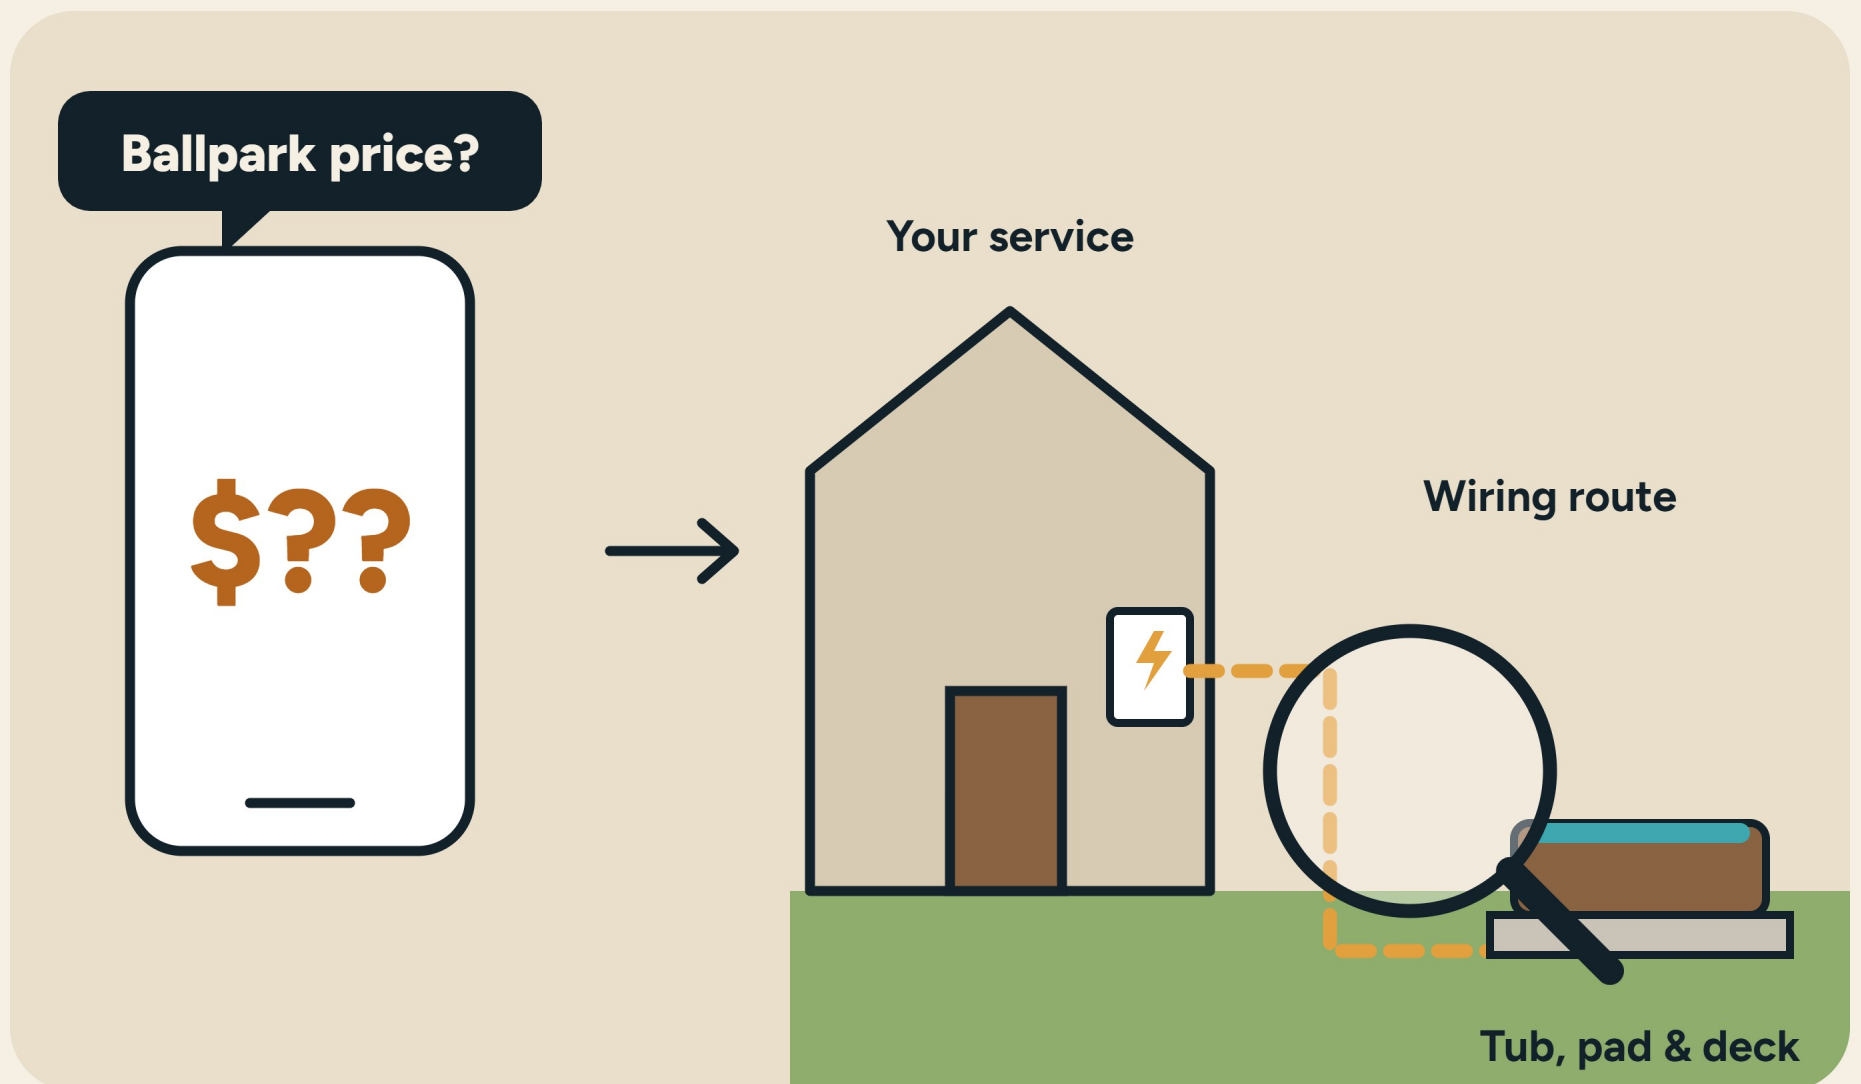

Why does the specific hot tub matter?

Different tubs can have **different electrical requirements.** Your electrician needs the model and specifications to plan your installation properly.

Can you give me a price over the phone?

Every home, yard, electrical service, wiring route, pad and deck is different. **Every job needs eyes on the property and a proper estimate.**

What should I budget for besides the tub?

The tub is just the tip. **Budget the full project — not just the tub.**

Why call before the concrete is poured?

Current electrical and **bonding requirements can affect the pad and the area around it.** Planning early keeps finished work from needing to be changed.

A hot tub went in a few years ago. Do the same rules apply today?

Not necessarily. Requirements can change or be clarified over time. **What you saw at another house — or what was acceptable years ago — may not apply to a new installation today.**

Who has the final say on compliance?

Your electrician

plans & installs to
current requirements

ESA

inspects & determines
final approval

We plan and install to the current requirements, but **the Electrical Safety Authority (ESA) ultimately determines approval** through the inspection process.

Four steps to a stress-free soak.

1 • PLAN

Narrow down the tub. Consult your electrician. Budget the full project.

2 • BUILD

Coordinate the concrete, decking, placement and electrical installation.

3 • ESA APPROVAL

Complete the required ESA inspection and approval process.

4 • ENJOY

Relax with safety, confidence and peace of mind.

Proper planning. Fewer surprises. Peace of mind when it's finally time to relax.
