

PETS AND THEIR PEOPLE

Tatiana

Owner: Laurie Rich, Sacramento

When Tatiana showed up at Sacramento Cat Hospital two years ago, she was completely furless and had the most advanced case of ringworm the vets had ever seen. Instead of euthanizing her, they rehabilitated her. Three months later, Laurie Rich adopted the cat. Tatiana still has some bald patches. "She has a bad combover," says Rich. "She's the Donald Trump of cats." But Rich wouldn't trade her for the world. "She's so funny and adorable," she says. "Everybody falls in love with Tatiana."
