DECONTAMINATION PRICING PACKAGES

HIGH PRESSURE DISTRIBUTION (FOG OR MIST)

This package is ideal for offices, restaurants, bars, public venues, and health facilities. We introduce a fog or mist system that will penetrate hard to reach places, and surfaces. We meet the required time for maximum surface density absorption. We inspect and follow up with a safety quality sweep to ensure floors are not slippery, and that all areas are treated. The fog treatment is a cool system that will not harm computers, and is safe around office paperwork

It is important to ensure any company offering to do your covid-19 sanitizing, and decontamination project has a proven quality management system. The proper planning, correct undiluted CDC approved chemicals, along with industrial commercial grade equipment is why we are your professional choice

SANI-SHIELD PROTECTION

Our Sani-Shield system is a more hands on approach with our crews doing systematic sweeps that are targeted for highly touched areas. Minimum of two sweeps are done at 15 minute increments. This is a spray & wipe process to clean switches, doors knobs, cabinet handles, and food/beverage machines. Afterwards we begin phase two by applying the shield system that stays on the surface for 30 - 60 mins. This time is needed for maximum surface density absorption, and dry time for safety on walkways

ANTI-MICROBIAL PAINT EXTENDED PROTECTION

This process is geared for businesses with waiting areas, high animal contact areas, and meal preparation/cooking areas. The patented Sherwin Williams anti-microbial paint product, once applied, kills 99% bacteria and germs keeping individuals with weak immune system from developing further complications. Once applied by our professional staff the painted surface is protected for up-to four (4) years. By applying this specialty paint to the walls, cleaning maintenance is a breeze. Meaning more protection against bacteria spores and airborne pathogens

As a promotion we will give any client of ours that mention this source our discounted rate price directly from Sherwin Williams. This will save up to 40% on paint product

SAFE ZONE TREATMENT (DAYCARE & SCHOOLS)

Kids!, Kids!, Kids! what can we say?! We absolutely love them, their innocence will never be saddened by this pandemic. So we've created this plan for schools and daycare specifically focusing on places you may never think to look. From the gums under the desk full of saliva, to the virus ladden cubby area, including all mats in the facility. Lets not forget about those locker rooms. WE CLEAN IT ALL

Along with our HPD, or SSP service this is a free add-on for daycares and schools only
