

# BRENTWOOD

ALL ROOM DIMENSIONS ARE APPROXIMATE.

These drawings are representational only; certain modifications have been made.

The BRENTWOOD is a two level home presenting great emphasis on cheery garden windows. The living room with corner fireplace presents a Pella® double-glazed garden window and alcove, as does the dining room. The kitchen has a smaller Pella® double-glazed garden window over the sink area. The breakfast area has sliders to the large deck which also can be constructed as an optional screened porch or family room. The two car attached garage is accessible through the breakfast area. A window-wall on the staircase leading to the second floor transforms what is typically a dark area into one of light and interest.

This home provides a family with the choice of three or four bedrooms with two and a half baths. In the three bedroom plan, the master bedroom suite becomes larger and provides space for a walk-in closet, dressing area and a whirlpool bath. Regardless which second floor plan is selected, the master bedroom suite features an additional touch of drama with its cathedral ceiling and skylight.
