

CHESAPEAKE

ALL ROOM DIMENSIONS ARE APPROXIMATE.

These drawings are representational only; certain modifications have been and will be made as the project is being constructed.

The CHESAPEAKE is a one level home with two bedrooms, one and a half baths, formal dining room, living room and kitchen with breakfast room. The second level may be expanded at your own pace, or you have the option of selecting our alternate plan at the outset providing an additional two bedrooms and a full bath.

The CHESAPEAKE is not excluded from the pleasant design features of the Hunting Ridge Farm homes. Some of the highlights include a cathedral ceiling in the living room allowing for skylights, a balcony and a fireplace. A cathedral ceiling also permits the use of a stunning Palladian window in the dining room bringing much natural light into the home. The fenced garden is accessible through the breakfast area and the deck can become an optional screened porch or family room. Should you select the optional finished second level, there will be skylights in the hallway and an interior window overlooking the dining room allowing further utilization of the dining room's large Palladian window.
