

KARRI

Seamless conversation –
no matter who or where you are

Daily communication can be a challenge.

Hospital life is hectic and **efficient communication is key to coordinating distributed teams.**

The problem - pager systems allow limited, very simple and mostly one-way communication. Mobile phones don't offer the data security needed and can act as a distraction on the ward floor

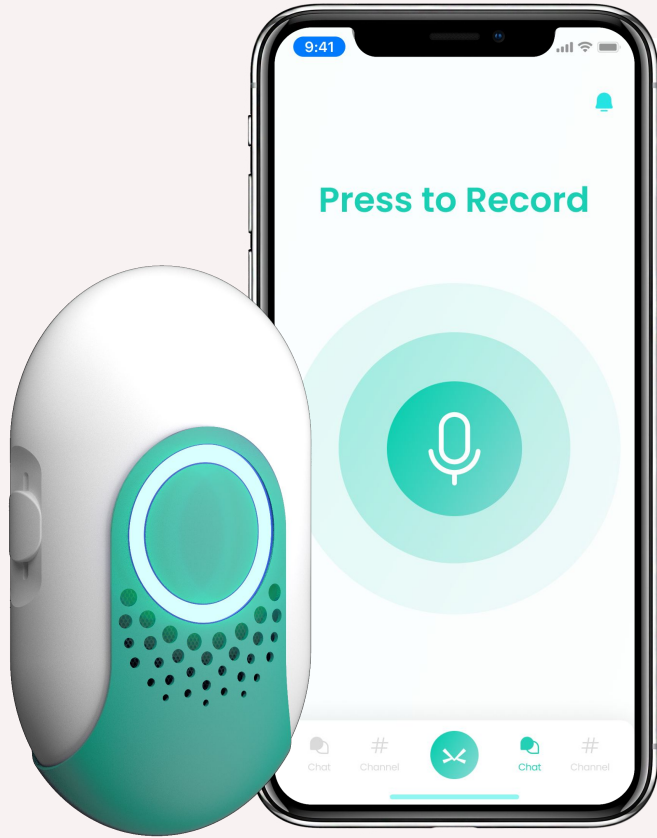

But connecting your team is key.

Finding an **easy, efficient way to communicate with your team** as a whole, in groups or on an individual basis is key. It enhances productivity and eradicates errors.

The solution is simple.

Meet Karri

Karri.io gives everyone in the team a voice by providing a **cost-effective and easy-to-use solution for team communication.**

It is a **one-touch device, operating on LTE or WiFi.** The administrator can easily **set up team, channel or direct communication via the Karri web platform or mobile app.**

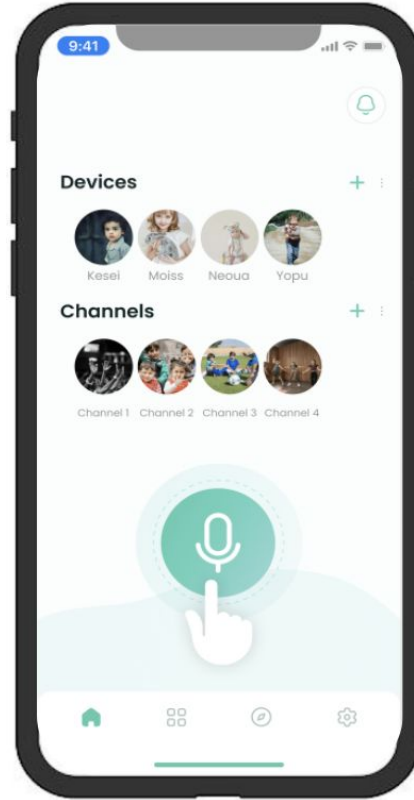

How it works

Administrator

Select the people you want to **send a message** to – choose a channel or individuals.

Record your message, adjust if needed, and **send**.

It's that **simple**.

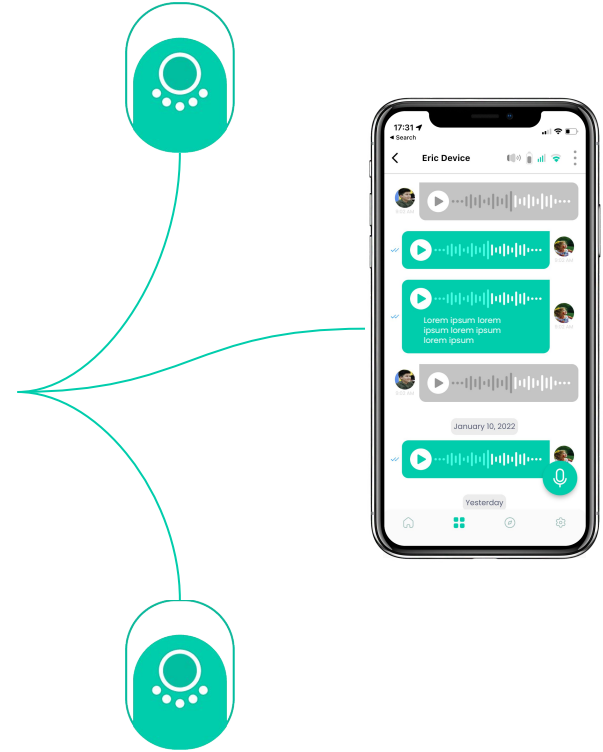

How it works

Receiver

Have your **Karri** on **mute or loud**.

Listen to your messages and **change between groups** by pushing the button.

Long push to **record a message** and **send back into the group**.

What makes Karri stand out

Specifications

Karri is not just **simple to set up** and use.

Its friendly **design, case durability and battery power** outperform mobile phones and walkie talkies alike.

LTE and Wifi compatible

Durable, waterproof hard casing

GPS tracking

Battery life approx. 48 to 72 hours

Lightweight design with easy to attach clip

Nationwide coverage

Instant set up, instant communication.

Setting up Karri is fast and easy

Setting UP Karri is **simple** – **download the app** on your phone **or access the browser based admin console** and **connect your devices**. That's it – you are ready to go!
