\$200 a Month

We aim to see every Southern Oregon family tap into the support, encouragement and framework offered in group parenting classes. We want all parents to feel empowered and equipped to parent well in today's society. Legacy Family & Leadership (ATW) is working to reduce social isolation and empower families to break free of generational cycles that put families and children at risk. While we often work with families that are already ODHS involved, helping with reunification plans and required parenting education hours; we want to be proactive and swim upstream, helping families before they get to this point. We believe that by normalizing parent education we can encourage parents to learn about child development and normal child behaviors and to foster relationships that lead to support systems for families and children.

Please consider supporting Legacy with a monthly donation.

Monthly partners enable LFL to continue serving and equipping families in our community. Together, we can see families THRIVE!

We also strive to strengthen local families and businesses by increasing the capacity of our young adults in the areas of communication, stress management, and leadership potential. We want to encourage young adults to increase their leadership and management skills to strengthen our workforce, and also encourage local small business owners to strengthen our local economy. Community workshops are open to everyone with the goal of fostering good communication skills and healthy stress-coping skills.
