Dear New Patient:

Please consider this letter a good faith estimate of the services we could potentially provide during and following your upcoming visit with Lowcountry Infectious Diseases (NPI 1194778548, TIN 57-1006773).

Primary service: Office Visit

New Referral 99242-99245 - \$117.00-\$276.00 for the initial visit

New Self Referral (HIV only) 99202-99205 - \$100.00-\$275.00 for the initial visit

Follow Up 99212-99215 - \$70.00-\$200.00 for each additional visit

During your visit, our provider could potentially order additional testing, such as, laboratory, pathology, radiology, home health, home infusion, office infusion, etc. These companies should provide you with a separate good faith estimate with additional pricing not included above.

This is only an estimate of the services we can reasonably expect to furnish at this time. This estimate is good for the year of the initial appointment date only. You have the right to enter into the patient-provider dispute resolution process if you are billed differently than stated above. This is not a contract and does not require you to receive services from us.

Sincerely,  
Lowcountry Infectious Diseases
