

# AUXBOX2

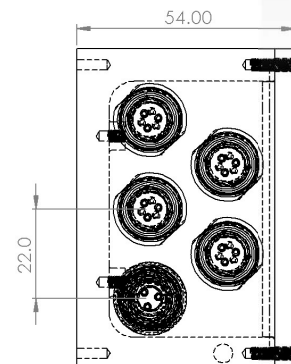

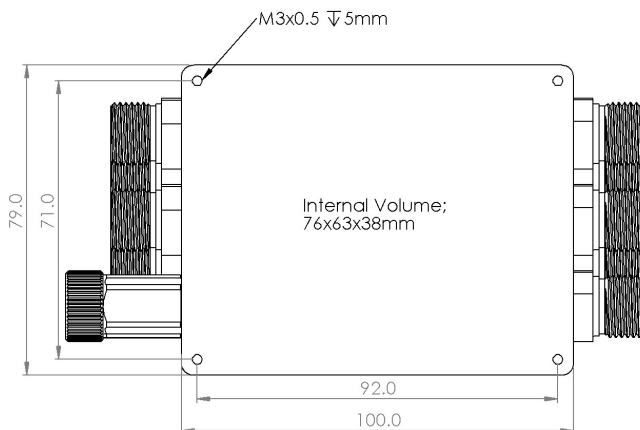

## Organize your accessories

The AUXBOX2 builds on the success of the original design, with a full 10 ports (M10x1.5mm). Use it as a junction box for lights and other accessories, or to house small electronics. With an internal volume large enough to hold a 5 port Ethernet switch or DC:DC converter, the housing provides many options. Poseidon ROVs use the AUXBOX2 for individually connected lights. Available in two standard versions: A0040 is preconfigured with Blue Trail Engineering's Cobalt connectors and fuse protection PCB, or A0039 bare box with only lid/O-ring/fasteners. US retail price \$899/\$395 USD.

### Specifications

Internal Dimensions	76 x 63 x 38mm (LWH)
Weight	580g (1.3 lbs.)
Connectors (A0040)	8x COBALT 3-pin 1x COBALT 6-pin Hybrid 1x Pressure relief valve
Housing Type	Machined Aluminum, Hard Anodized
Depth rating	600m standard
Fuse ratings	9x 2Amps + 1x 10Amps
