Lanai SAR

An upgraded version of the Lanai ROV. This Search and Rescue model includes a larger console, power supply, and tether for SAR dive teams. The deck space can accommodate a multibeam imaging sonar such as an Oculus or Gemini and includes a grabber with extended reach "limb gripper" jaws ideally suited to the task. Purchase includes a free two-day SAR training course at customer location (US) for up to 6 students!

Specifications		
Depth Rating	400m (1,312ft)	
Dimensions	22x14x12in (LWH)	
Weight	30lbs (in air)	
Payload Capacity (fresh water)	3lbs	
Thrusters	4 lateral + 4 vertical w/ connectors	
Speed	3 knots	
Video	1080 HD IP camera w/ tilt	
Lights	1,500 lumens x4	
Power	1,500W standard	
Telemetry System	-Aux 3x Ethernet -1x RS232/485 -Power: 5/12/24 VDC regulated (120W total)	

Tether		
Breaking Strength	440 lbs	
Diameter	9.3mm (neutral- freshwater)	
Conductors	2x19AWG+2TP+Earth	

Integrated Console		
Output Voltage	400 VDC, 3,000W	
Input Voltage	120/240 VAC	
Monitor	22in HD (1,000NIT)	
Case	22.4x13.9x8.5in, 29lbs	
Fully isolated output with Line Isolation Monitor		
Intel PC, all software configured, pro hand controller		

Standard equipment: 250m tether on reel, console and controller, Newton grabber, spare parts/tools, and waterproof transport cases. 2-year warranty, P/N:SYS0034.
