Pro Hand Controller - Lite

Our Pro Hand Controller was designed by Professional ROV pilots. A sealed Hall-Effect 3 axis joystick coupled with high precision 12-bit converter means precise control. Features like trim knobs allow operators to fly surveys for hours on end or to hold position in heavy currents with only occasional inputs of the joystick. Vertical adjustments are made using the proportional knob on the side, while a roll and pitch adjustment switch enables careful corrections when flying surveys. The controller is compatible with any of our Lanai or Maui systems, as well as the Blue ROV by Blue Robotics. Includes protective case and 2-year warranty. US retail price $1,500.00 USD.

Specifications	
Dimensions	220mm x 160mm x 60mm (LWH) 8.6in x 6.3in x 2.4in (excluding joystick)
Weight	550g (1.2 lbs.)
Cord	3 meters (10ft) USB-A
Housing Type	Carbon Fiber reinforced Polymer
Compatible OS	Windows 10/11, Linux
Labels	Custom labels available
Part Number	E0046
