

Description:

The A10 motor is designed for easy integration on any type of ROV, USV, or AUV. Robust and durable, it has been engineered for maximum longevity and easy maintenance. Assembled in France. 2-year warranty. Worldwide exclusive distribution by ROV EXPERT.

Advantages:

- ✓ **Ball bearing motor** — Increased reliability and durability, with reduced heat generation
- ✓ **Optimized cleaning** — Front and rear vents for easier cleaning and lubrication
- ✓ **Rotating cone without support arms** — Ensures more stable laminar flow and reduces turbulence
- ✓ **Aluminum propellers available as an option** — Enhanced robustness and reduced risk of entanglement with algae or debris
- ✓ **Repair-friendly design** — Simplified maintenance and easy parts replacement
- ✓ **2-year warranty** — Covers parts and labor in case of breakage under normal usage conditions

Specifications :

Cable	1 meter – 3*18 AWG
Propeller Material	Anodized aluminum or HP Multi jet fusion

Body Material	HP Multi jet fusionfusion
Fastener material	Titanium Grade 2
Continuous Power	170 W – 12 to 24V
Peak Power	200 W
Speed	2000 - 8500 RPM
KV Rating	500
Overall Dimensions	Length 90.00 mm – Diameter 77.30 mm
Core Diameter	31.50 mm
Propeller Diameter	60.50 mm
Mounting Hole Spacing	15 x 15 mm - M3
Termination options	- None (1m pigtail) - Bluetrail Cobalt 3 Pins - Overmolding <i><u>Note : Not compatible with wetlink</u></i>
