

Tech Tip#3: – MINI SKID STEER QUICK-ATTACH COMPATIBILITY

Many mini skid steers on the market use a proprietary quick-attach plate that looks similar to a Toro/Dingo mount — but is NOT the same.

If your machine has an SCL850-style proprietary quick-attach, standard Toro/Dingo “universal mini” attachments will NOT fit without a conversion plate.

“Toro/Dingo mount” or “Universal Toro/Dingo mount”

APROX 9.5 X 23.75 INCHES

SCL850-style proprietary quick-attach mount

APROX 12.5 X 23.75 INCHES

✓ KNOWN MACHINES USING THE SCL850-STYLE PROPRIETARY MOUNT:

- ✓ SCL850 Mini Skid Steer
- ✓ Diggitt Mini Skid Steers
- ✓ EINGP Mini Skid Steers
- ✓ Hurricane Mini Skid Steers
- ✓ Valley Pioneer Mini Skid Steers
- ✓ Other machines built with the same SCL850-style quick-attach system

⚠ WHY THIS MATTERS:

- Proprietary mounts limit attachment choices
- Brand-specific attachments are often more expensive
- Many universal mini skid attachments will not latch or seat correctly

THE SOLUTION:

A conversion plate allows these machines to use the Toro / Dingo Universal Mini attachment system — opening the door to more options, better availability, and lower prices.

Tech Tip Summary

“Toro/Dingo mount” or “Universal Toro/Dingo Mount” will not fit the following machines

- ✓ SCL850 Mini Skid Steer
- ✓ Diggitt Mini Skid Steers
- ✓ EINGP Mini Skid Steers
- ✓ Hurricane Mini Skid Steers
- ✓ Valley Pioneer Mini Skid Steers
- ✓ Other machines built with the same SCL850-style quick-attach system

Best choice is to use a conversion plate
