A week of fun, creativity, and of course – engineering! Over the course of a week, students will invent new machines and explore creative design solutions using the engineering design process. Design your own drawing robot, make your own electric playdough, build your own operation game, and use your tinker box to invent something new.

We encourage learning that fosters students' creativity, courage, and curiosity through open-ended challenges in the fields of STEM, fine arts, and learning. The sky's the limit when you bring your imagination to the table!

Do you love robots and have a passion for coding and adventure? This is YOUR camp! Young engineers will program and code their robots to complete awesome activities. Using the fundamentals of coding, kids will be introduced to variables, conditions, functions, and more as they create a time bomb, navigate a maze, and code the sphero to escape a room as quickly as possible. Campers will then use the engineering design process to build the ultimate go-kart to win the race. The only limit is your imagination – we thrive to inspire curiosity, creativity, and innovation!

## ZERO TOLERANCE

Our zero tolerance policy exists to protect our campers and leaders against violence, bullying, name calling, teasing, etc. At Camp JCC we do not want to see any camper dismissed for behavioural reasons. We make every effort to work with day campers and their families, allowing them the opportunity to correct their mistakes when they are misbehaving. However, we do have a zero tolerance policy for campers committing excessive verbal or physical abuse towards campers or leaders. This behaviour would include: hitting, punching, kicking, or other forms of fighting, verbal threats of violence, and excessive name calling and swearing. Furthermore, any camper caught stealing or damaging another person's property will also be subject to our zero tolerance policy. These previously mentioned behaviors will not be tolerated and may result in expulsion for the remainder of the camp session.
