

CONCRETE ACID STAIN

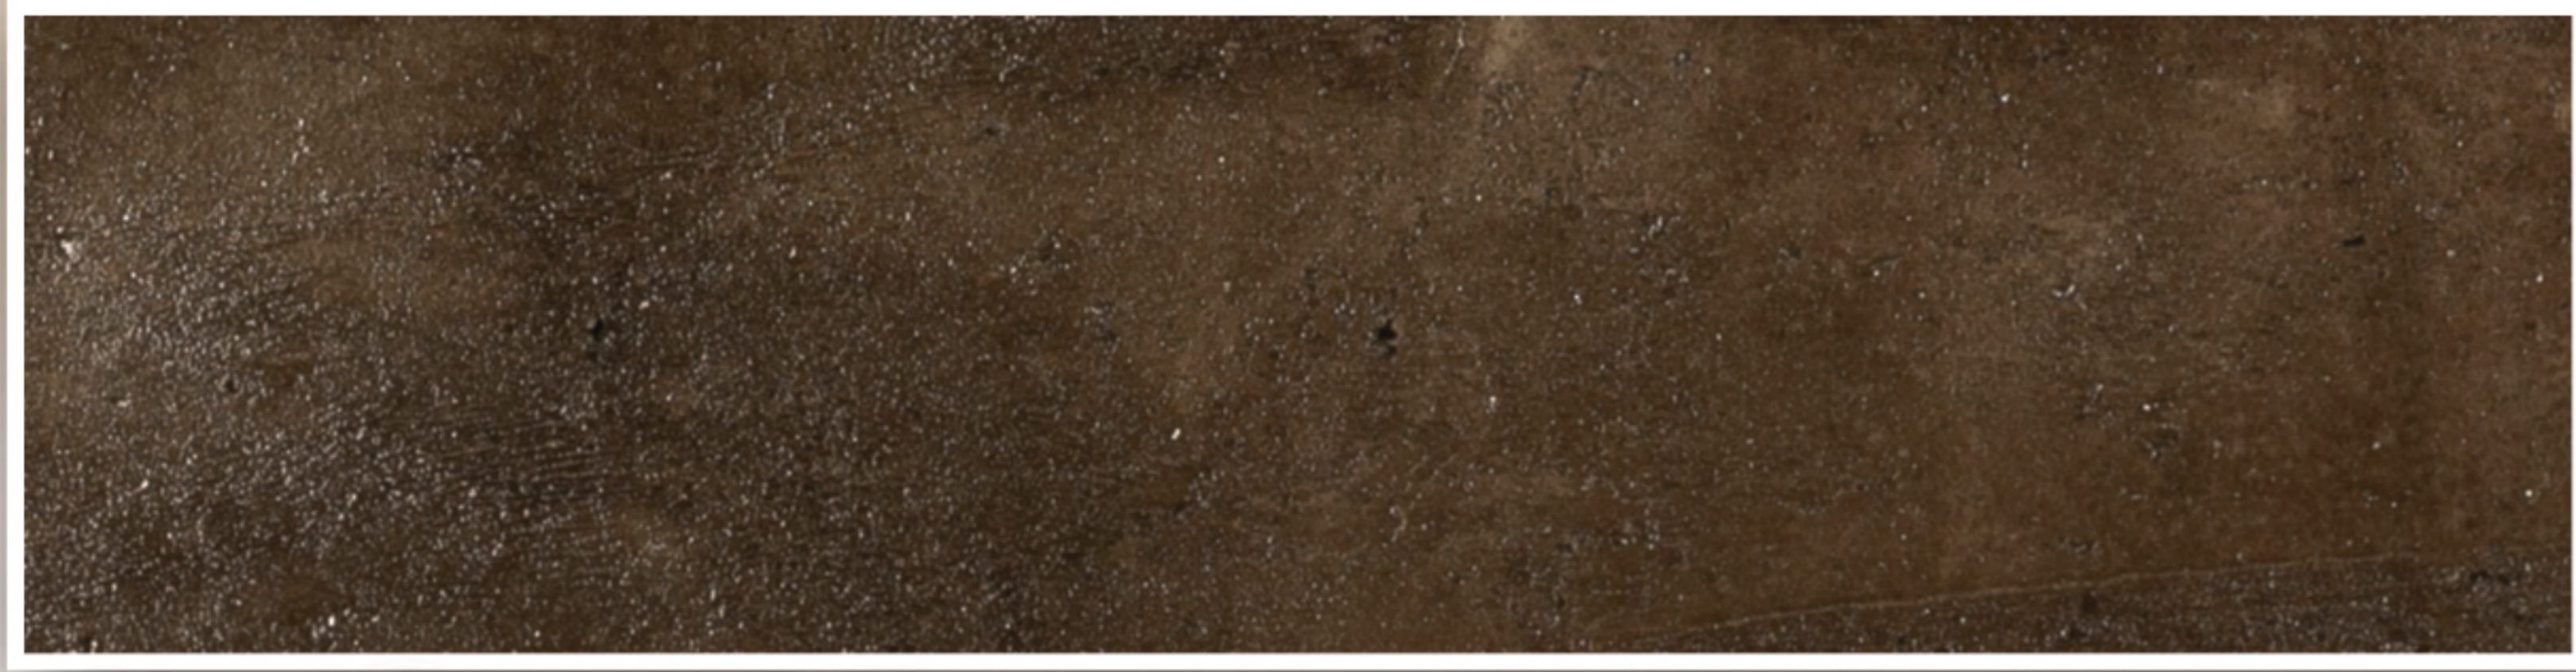

- Great for stamped or smoothed finish concrete
- Broad variety of colors to choose from
- Concentrated, Chemically reactive formula

- Uses the imperfections in a concrete surface rather than covering them up
- Permanently transforms ordinary concrete into the beautiful look of natural stone
- Easy for DIYers to use

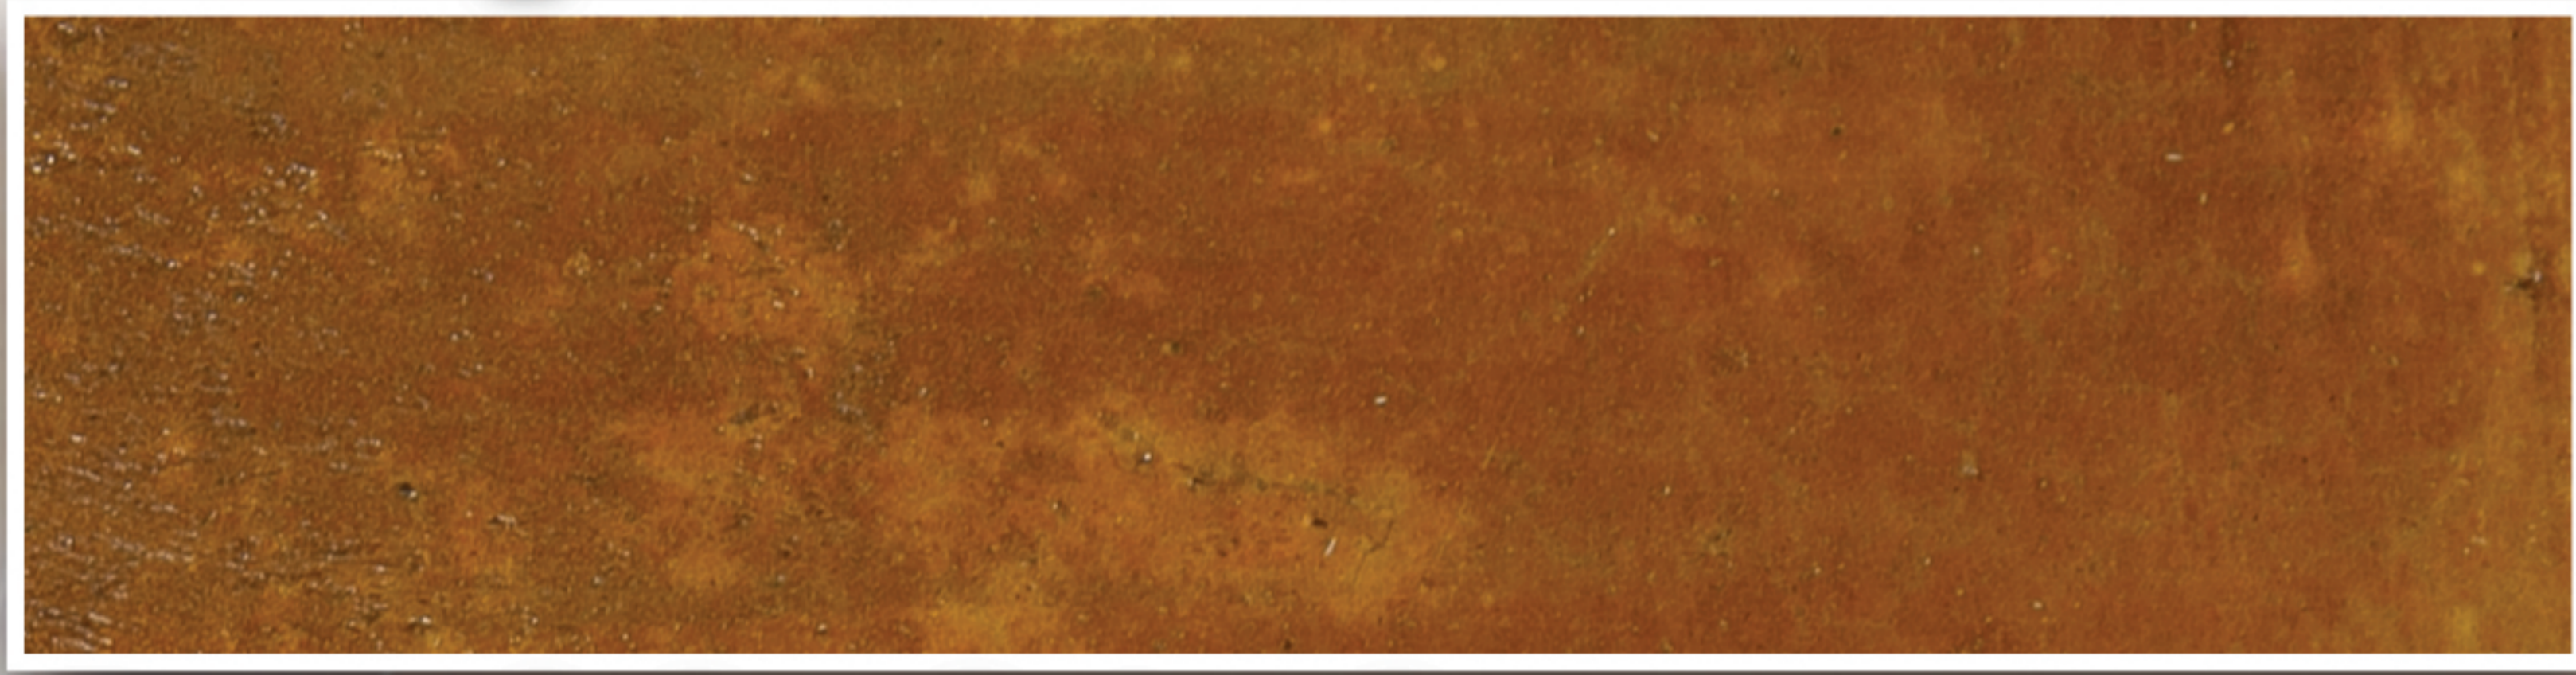

CONCRETE ACID STAIN

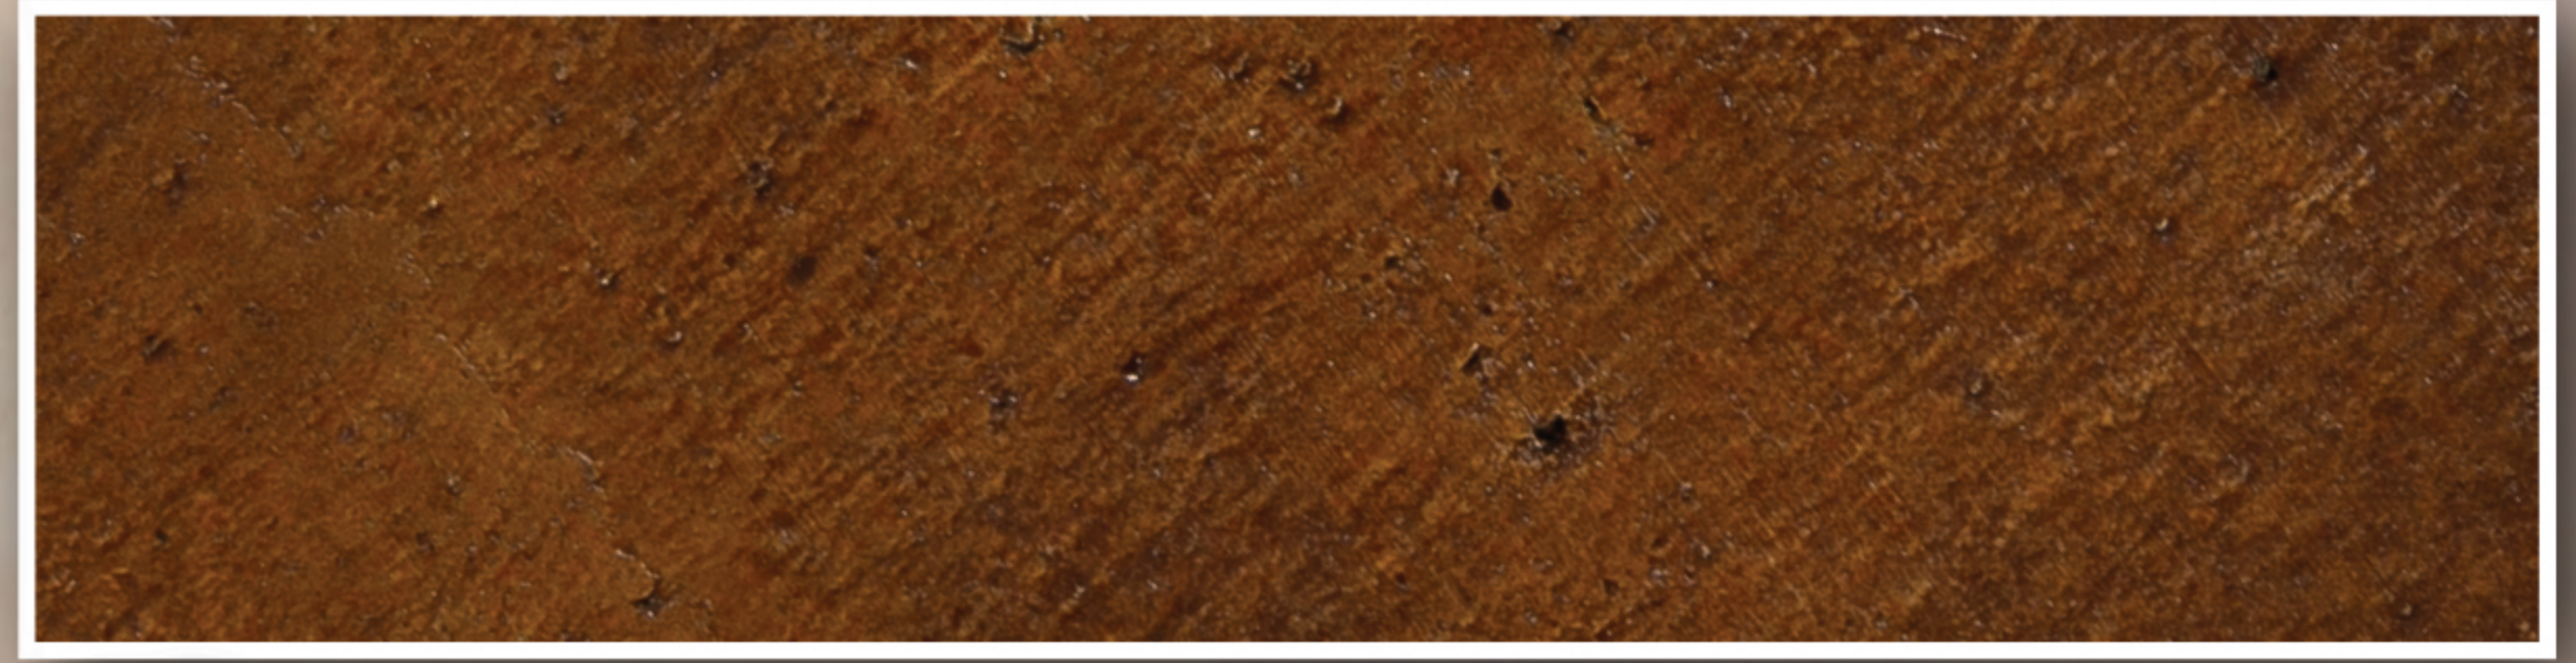

Antique Bronze

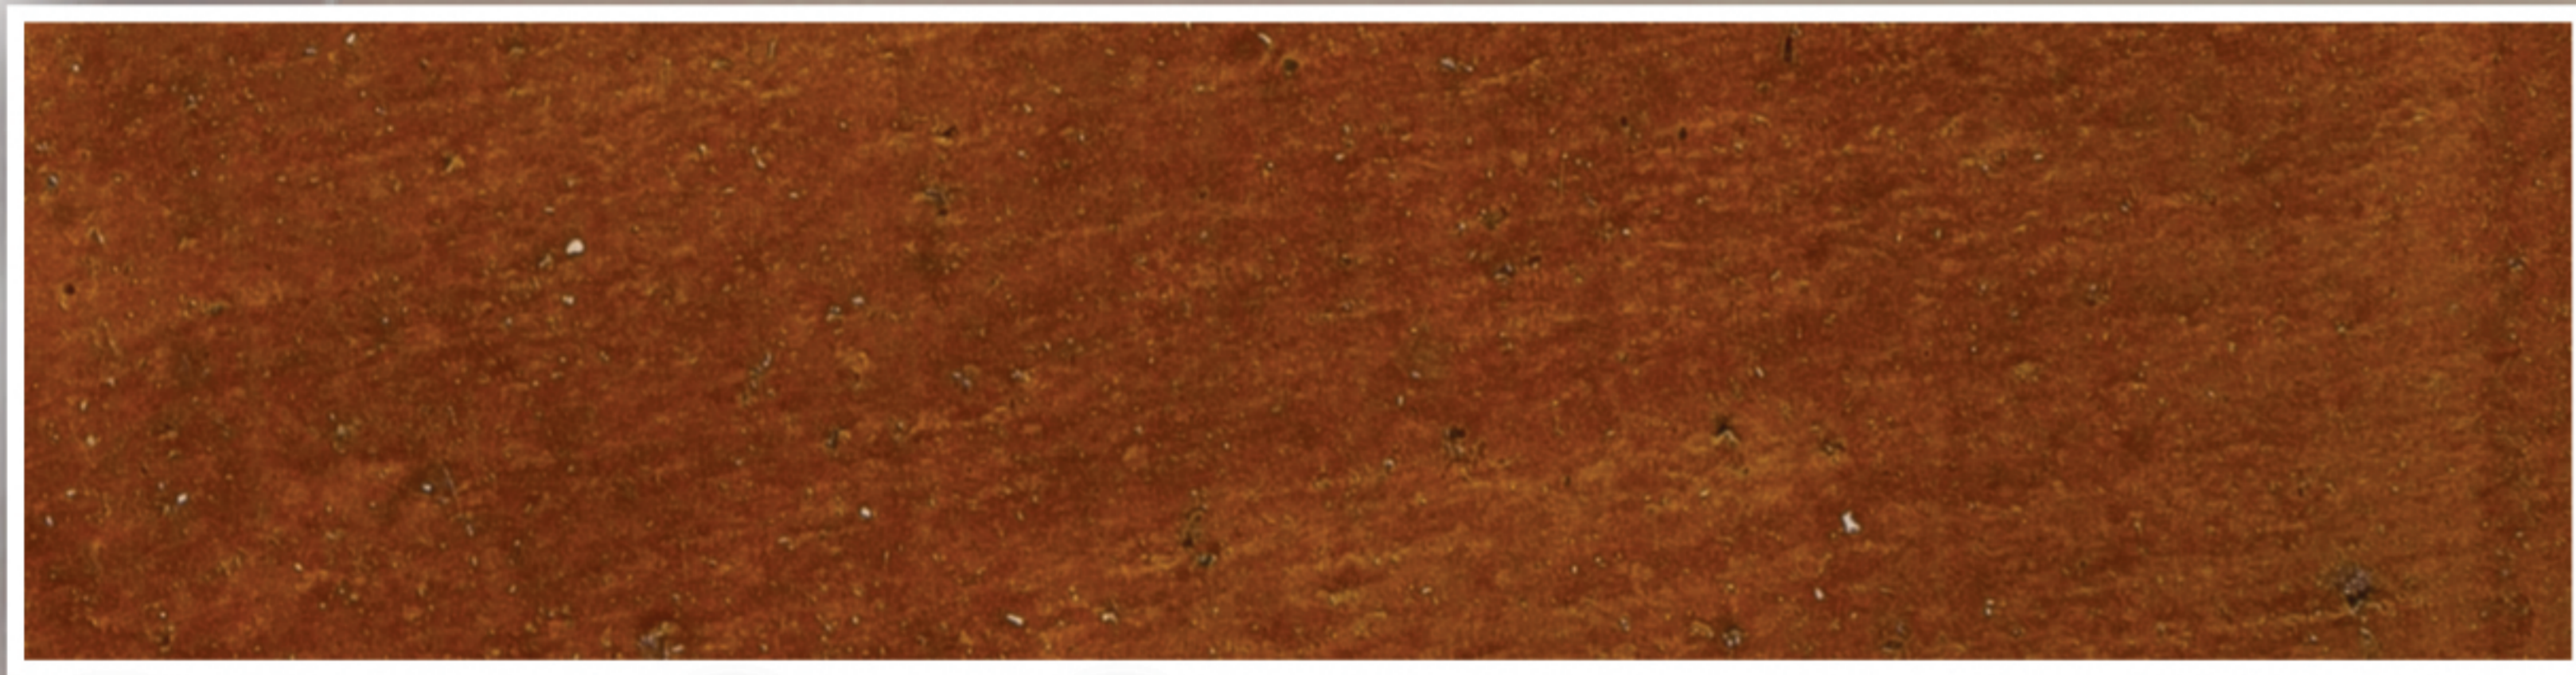

Weathered Oak

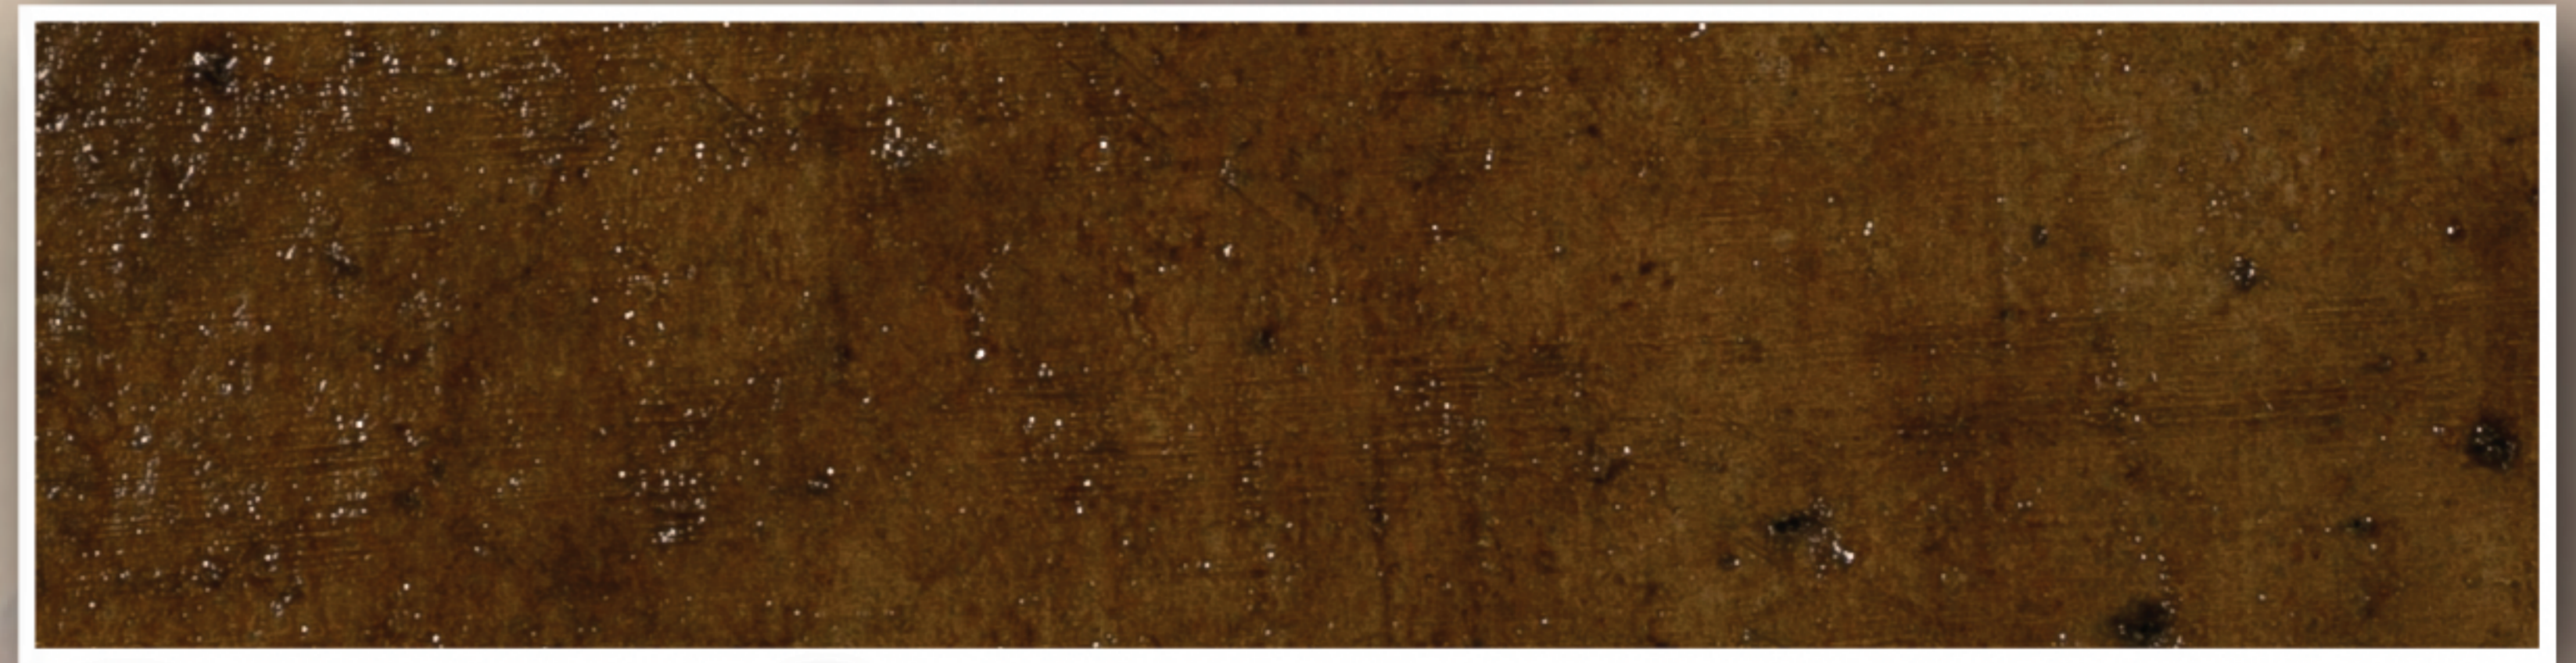

Burnished Amber

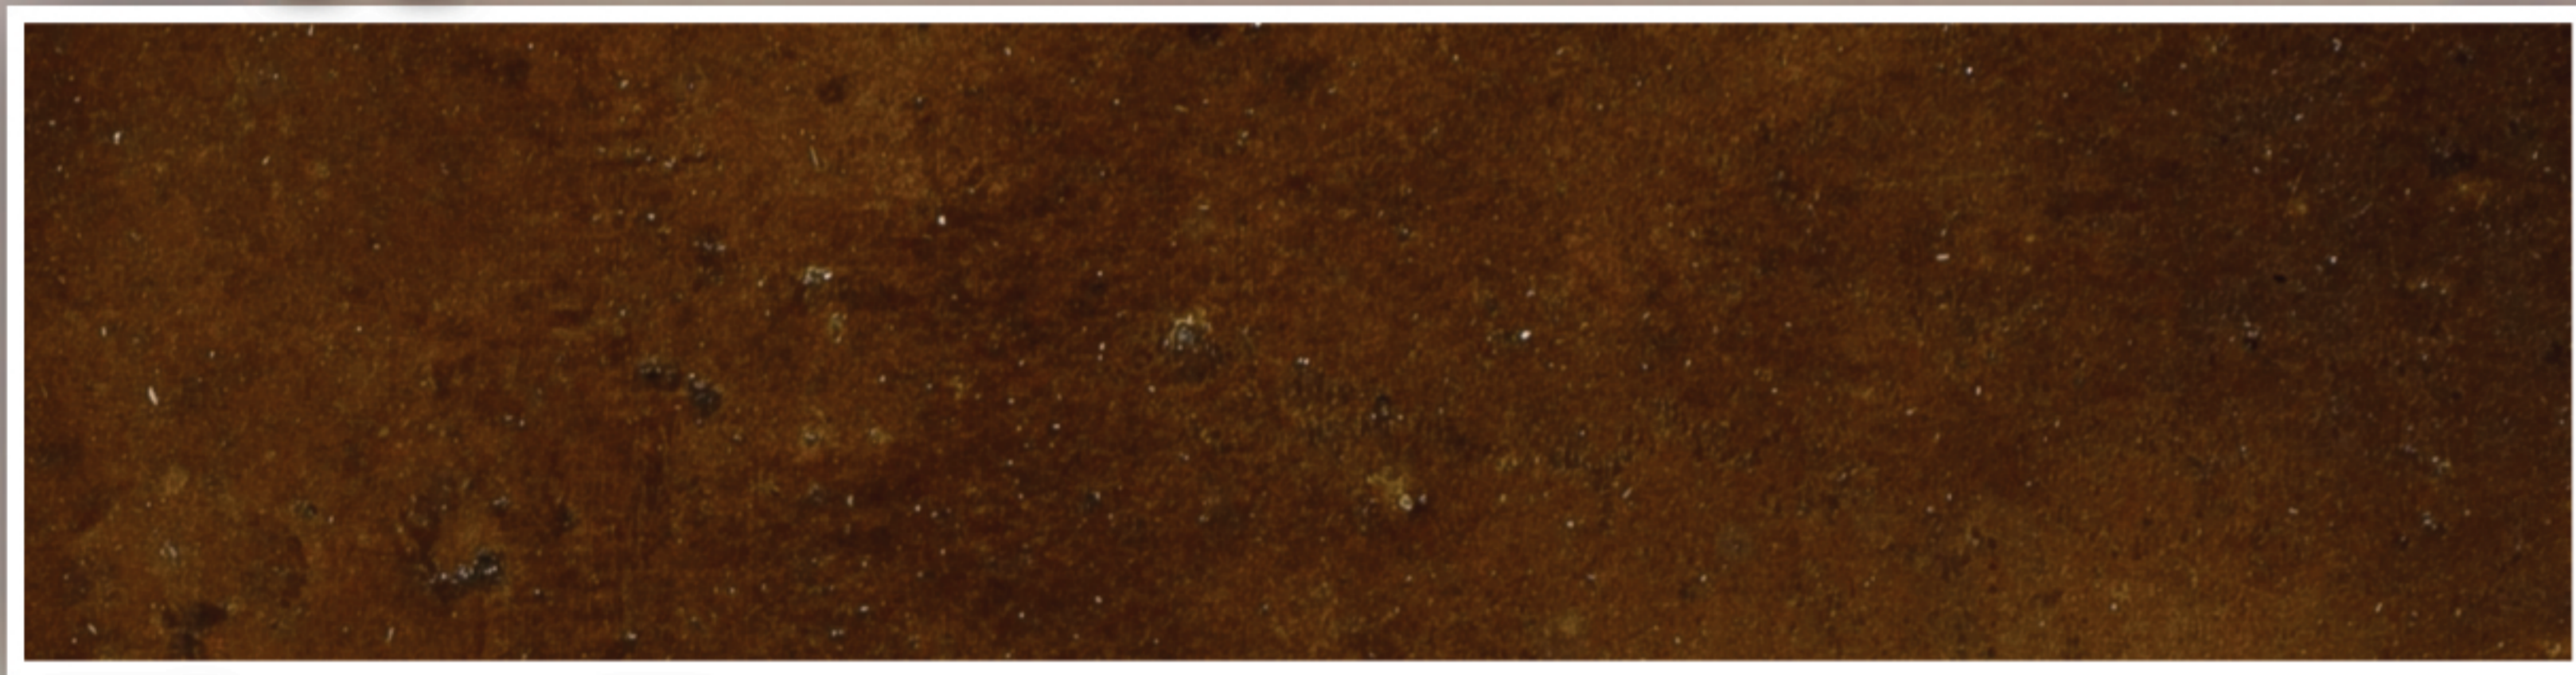

Chestnut

Copperhead

Gunstock

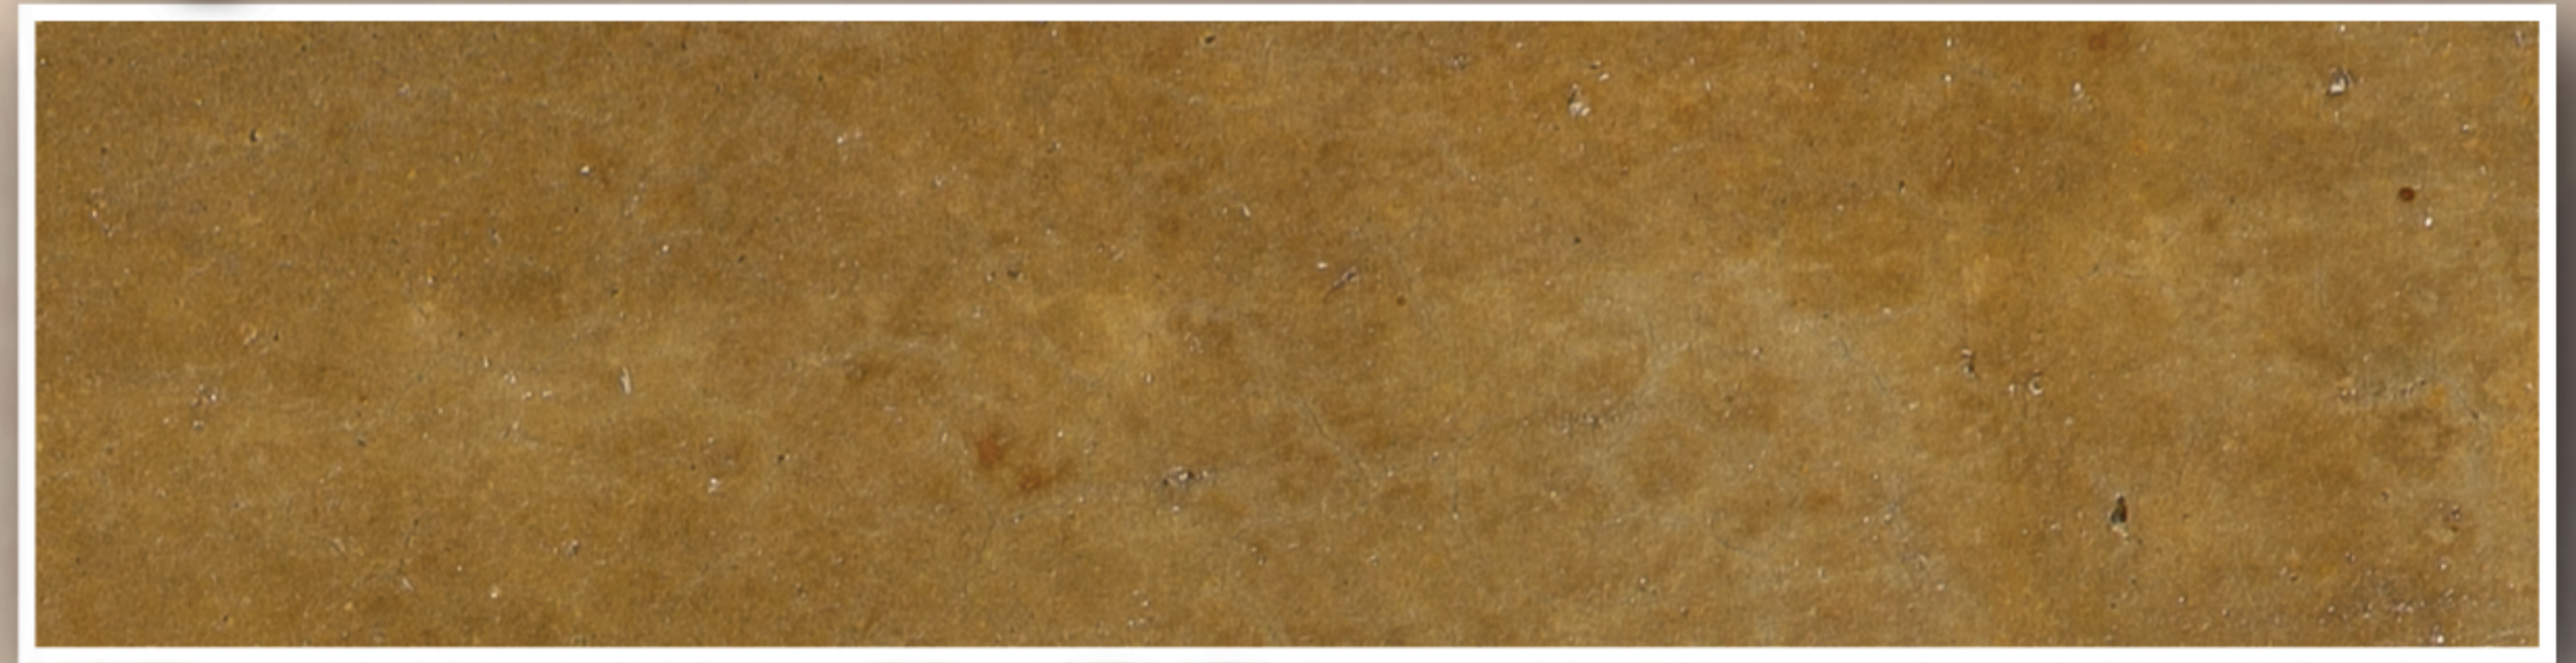

Tiger Eye

Apache

Turquoise

Harvest Gold

Willow

This color guide is designed to show a representation of Deco-Crete Concrete Acid Stain when applied to natural gray concrete then sealed. It does not guarantee the final color is an exact match. Color affects will vary when applied to stamp overlays, microtoppings, and integrally colored concrete. Because there are so many variables involved in the chemical reaction process — mix design, age, porosity, texture, & color of concrete substrate — each application of Deco-Crete Concrete Acid stain creates unique results. Deco-Crete strongly recommends that a job site sample be performed for each application. Deco-Crete Concrete Acid Stain creates permanent results so all site samples should be done in an inconspicuous area.
