August 6, 2018

Dear Federal and State Agency and Tribal Nation Representative:

On July 9, 2018, Texas Gulf Terminals Inc. (TGTI) submitted an application to the U.S. Coast Guard (Coast Guard) and U.S. Maritime Administration (MARAD) seeking approval to own, construct, and operate a deepwater port for the export of domestically produced crude oil (Encl. (1)). TGTI, under cover of this letter, has sent your agency one or more copies of the application for review.¹ As an agency with potential interest in this application, I request your review and assistance in processing it. If your agency has jurisdictional authority over some aspect of the TGTI project (e.g., pipeline right of way, clean air/clean water permitting, dredge-fill permit, onshore storage terminal facility construction, etc.), I request your heightened attention to those matters over which your agency may have direct oversight. Pursuant to criteria set forth in the Deepwater Port Act (DWPA) (33 United States Code §§ 1501 – 1524), Texas is designated as an Adjacent Coastal State for the TGTI deepwater port application.

The DWPA grants the Secretary of Transportation the power to issue a license to own, construct, and operate a deepwater port. The Secretary has delegated this licensing authority to the Maritime Administrator. The Coast Guard is the co-lead Federal agency for processing TGTI's application. Together, MARAD and the Coast Guard will consult with other Federal agencies, Tribal representatives, appropriate Texas State agencies, and the Office of the Governor to ensure a complete review under the National Environmental Policy Act, and other applicable environmental protection statutes, is completed.

The overall project would consist of three distinct, but interrelated components: 1) the "offshore" component, 2) the "inshore" component, and 3) the "onshore" component. The proposed deepwater port (offshore component) would be located approximately 12.7 nautical miles off the coast of North Padre Island (Kleberg County, TX) and consist of 14.71 miles of two (2) new parallel 30-inch-diameter crude oil pipelines, which terminate at a single point mooring (SPM) buoy. The SPM buoy system would be positioned in water depths of approximately 93 feet and consist of a pipeline end manifold, catenary anchor leg mooring system, and other associated equipment.

The inshore components associated with the proposed project includes 5.74 miles of 2 new 30-inch-diameter pipelines and onshore valve station used to connect the onshore project components to offshore project components. The inshore portions of the proposed pipeline infrastructure cross the Laguna Madre bay complex, the Gulf Intracoastal Waterway, and extend across North Padre Island to the mean high tide line located at the interface of North Padre Island and the Gulf of Mexico. Additionally, the inshore project components includes the installation of an onshore valve station on North Padre Island to allow for the isolation of portions of the proposed pipeline infrastructure for servicing, maintenance, and inspection operations.

¹ On July 13, 2018, a limited distribution of the application was made to several Federal agencies to determine administrative completeness. If your agency was on the earlier distribution, you will not receive an additional distribution unless specifically requested.

Onshore components associated with the proposed project include the construction and operation of an onshore storage terminal facility (OSTF), booster station, and approximately 6.36 miles of two new 30-inch-diameter parallel pipelines located within Nueces and Kleberg Counties, TX. The OSTF would occupy approximately 150 acres in Nueces County, TX and would consist of all necessary infrastructure to receive, store, measure and transport crude oil through the proposed inshore and deepwater port pipeline infrastructure. ²The proposed booster station would occupy approximately 8.25 acres in Kleberg County, TX and would consist of the necessary pumping infrastructure to support the transport of crude oil from the OSTF to the deepwater port. Onshore pipeline infrastructure would extend from the OSTF to the landward side of the mean high tide line located at the interface of the western shoreline of the Laguna Madre.

MARAD published the TGTI Notice of Application (NOA) in the Federal Register on August 6, 2018 (83 FR 38455). It may be viewed at www.regulations.gov under docket number **MARAD-2018-0114**; a copy of the NOA is included with this letter (Encl. (2)). The docket includes a copy of the application and will be the repository for all associated Federal Register notices, communications, public comments, and the Draft and Final Environmental Impact Statement. The application distribution list is provided as Encl. (3).

Volumes (3) and (4) of the application contain business confidential information related to port operations, survey data, and corporate information. If you require access to this information, need additional copies of the application, or have any questions or concerns, please contact Mr. Roddy Bachman, Coast Guard project manager, (202) 372-1451 (Roddy.C.Bachman@uscg.mil); or Mr. Wade Morefield, MARAD project manager (202) 366-7026 (wade.morefield@dot.gov).

We appreciate the expertise and experience your respective organizations bring to this process and look forward to working with you. By separate correspondence, copies of this application have been sent to the Office of the Governor of Texas.

Sincerely,

Curtis E. Borland
Attorney/Advisor,
Vessel and Facility Operating Standards Division
U.S. Coast Guard

Encl: (1) TGTI Deepwater Port Project Application (July 9, 2018)
(2) Federal Register Notice of Application
(3) TGTI Deepwater Port Application Distribution List

Copy: Ms. Yvette Fields, Director, Office of Deepwater Ports, Maritime Administration
Mr. Tim Feehan, Tetra Tech

² At the time of filing, TGTI has not determined the number, precise routing, ownership, extent to which destinations other than the OSTF will be served and other details relating to the shipment of oil from the production field(s) to the OSTF. TGTI will be required to supplement the application when this information is available.

4. Research and Demonstration Capacity

The proposal should demonstrate the applicant's capability and capacity (either internally or through external sources) to conduct research, analysis, and demonstration projects related to mobility management and transportation coordination in support of the CCAM and its members.

5. Management Approach

The proposal must include an effective project management plan to administer and manage the NCMM and must demonstrate that the applicant has the technical capacity to carry out the plan. FTA will evaluate the applicant's:

- a. Technical capacity to administer and manage the services proposed;
- b. Total budget and staffing;
- c. Evidence of understanding of the NCMM mission and comprehensive technical approach to delivering the NCMM;
- d. Plan for evaluation and data collection;
- e. Plan for effective and meaningful stakeholder engagement; and
- f. Plan for coordinating with FTA and other CCAM member staff.

F. Federal Award Administration

1. Federal Award Notices

Final award decisions will be made by the Administrator of the Federal Transit Administration. In making these decisions, the Administrator will take into consideration:

- a. Recommendations of the review panel;
- b. past performance of the applicant regarding programmatic and grants management compliance;
- c. the reasonableness of the estimated cost to the government considering the available funding and anticipated results; and
- d. the likelihood that the proposed project will result in the transportation outcomes expected.

The FTA will notify the successful organization and may announce the selection on its website <https://www.transit.dot.gov>. Following notification, the successful entity will be required to submit its application through the FTA Transit Award Management System (TrAMS). The FTA will work with the successful applicant to develop a detailed cooperative agreement. The FTA will award and manage a cooperative agreement through TrAMS.

2. Award Administration

- a. Grant Requirements: The successful applicant will apply for a cooperative

agreement through TrAMS and adhere to the customary FTA grant requirements of Section 5314, Technical Assistance and Workforce Development. There is no pre-award authority for this project. Discretionary grants and cooperative agreements greater than \$500,000 will go through the Congressional notification and release process. Assistance regarding these requirements is available from FTA.

b. Standard Assurances: The applicant assures that it will comply with all applicable Federal statutes, regulations, executive orders, FTA circulars, and other Federal administrative requirements in carrying out any project supported by the FTA grant. The applicant acknowledges that it is under a continuing obligation to comply with the terms and conditions of the cooperative agreement issued for its project with FTA. The applicant understands that Federal laws, regulations, policies, and administrative practices might be modified from time to time and that modifications may affect the implementation of the project. The applicant agrees that the most recent Federal requirements will apply to the project, unless FTA issues a written determination otherwise. The applicant must submit the Certifications and Assurances before receiving a cooperative agreement if it does not have current certifications on file.

3. Reporting

Post-award reporting requirements include submission of Federal Financial Reports and Milestone Progress Reports in TrAMS on a monthly or quarterly basis, as determined by the FTA Project Manager. Documentation is required for payment. Additional reporting may be required specific to the National Center for Mobility Management and the recipient may be expected to participate in events or peer networks related to mobility management and coordinated transportation. The Federal Financial Accountability and Transparency Act (FFATA) requires data entry at the FFATA Sub Award Reporting System (<http://www.FSRS.gov>) for all sub-awards and sub-contracts issued for \$25,000 or more, as well as addressing executive compensation for both grantees and sub-award organizations.

Additionally, FTA is required to report to Congress every year on the value of Section 5314 investments. Applicants will be required to provide details indicating the need, problem, or opportunity addressed by activities of the program. The national significance and relevance to the public transportation industry must also be clearly detailed.

4. Legal Capacity

Applicants must certify that there are no legal issues which would impact their eligibility and authority to apply for FTA funds, or prevent their acceptance of FTA funds.

G. Federal Awarding Agency Contacts

For further information concerning this notice, please contact the Technical Assistance program manager Carl Ringgold by phone at 202-366-6508, or by email at carl.ringgold@dot.gov. A TDD is available for individuals who are deaf or hard of hearing at 800-877-8339.

K. Jane Williams,

Acting Administrator.

BILLING CODE P

DEPARTMENT OF TRANSPORTATION

Maritime Administration

[Docket No. MARAD-2018-0114]

Deepwater Port License Application: Texas Gulf Terminals, Inc.

AGENCY: Maritime Administration, Department of Transportation.

ACTION: Notice of application.

SUMMARY: The Maritime Administration (MARAD) and the U.S. Coast Guard (USCG) announce they have received an application for the licensing of a deepwater port and that the application contains all required information. This notice summarizes the applicant's plans and the procedures that will be followed in considering the application.

DATES: The Deepwater Port Act of 1974, as amended, requires any public hearing(s) on this application to be held not later than 240 days after publication of this notice, and a decision on the application not later than 90 days after the final public hearing.

ADDRESSES: The public docket for MARAD-2018-0114 is maintained by the U.S. Department of Transportation, Docket Management Facility, West Building, Ground Floor, Room W12-140, 1200 New Jersey Avenue SE, Washington, DC 20590.

The license application is available for viewing at the [Regulations.gov](http://www.regulations.gov) website: <http://www.regulations.gov> under docket number MARAD-2018-0114.

We encourage you to submit comments electronically through the Federal eRulemaking Portal at <http://www.regulations.gov>. If you submit your comments electronically, it is not necessary to also submit a hard copy. If

you cannot submit material using <http://www.regulations.gov>, please contact either Mr. Roddy Bachman, USCG or Mr. Wade Morefield, MARAD, as listed in the following **FOR FURTHER INFORMATION CONTACT** section of this document. This section provides alternate instructions for submitting written comments. Additionally, if you go to the online docket and sign up for email alerts, you will be notified when comments are posted. Anonymous comments will be accepted. All comments received will be posted without change to <http://www.regulations.gov> and will include any personal information you have provided. The Federal Docket Management Facility's telephone number is 202-366-9329, the fax number is 202-493-2251.

FOR FURTHER INFORMATION CONTACT: Mr. Roddy Bachman, U.S. Coast Guard, telephone: 202-372-1451, email: Roddy.C.Bachman@uscg.mil or Mr. Wade Morefield, Maritime Administration, telephone: 202-366-7026, email: Wade.Morefield@dot.gov. For questions regarding viewing the Docket, call Docket Operations, telephone: 202-366-9826.

SUPPLEMENTARY INFORMATION:

Receipt of Application

On July 9, 2018, MARAD and USCG received an application from Texas Gulf Terminals, Inc. (TGTI) for all Federal authorizations required for a license to own, construct, and operate a deepwater port for the export of oil authorized under the Deepwater Port Act of 1974, as amended, 33 U.S.C. 1501 *et seq.* (the Act), and implemented under 33 Code of Federal Regulations (CFR) parts 148, 149, and 150. After a coordinated completeness review by MARAD, the USCG, and other cooperating Federal agencies, it was determined that the application was complete and contains all information necessary to initiate processing of the application.

Background

The Act defines a deepwater port as any fixed or floating manmade structure other than a vessel, or any group of such structures, that are located beyond State seaward boundaries and used or intended for use as a port or terminal for the transportation, storage, and further handling of oil or natural gas for transportation to, or from, any State. A deepwater port includes all components and equipment, including pipelines, pumping or compressor stations, service platforms, buoys, mooring lines, and similar facilities that are proposed as part of a deepwater port to the extent

they are located seaward of the high water mark.

The Secretary of Transportation delegated to the Maritime Administrator authorities related to licensing deepwater ports (49 CFR 1.93(h)). Statutory and regulatory requirements for processing applications and licensing appear in 33 U.S.C. 1501 *et seq.* and 33 CFR part 148. Under delegations from, and agreements between, the Secretary of Transportation and the Secretary of Homeland Security, applications are jointly processed by MARAD and USCG. Each application is considered on its merits.

In accordance with 33 U.S.C. 1504(f) for all applications, MARAD and the USCG, working in cooperation with other Federal agencies and departments considering a deepwater port application shall comply with the requirements of the National Environmental Policy Act (NEPA) of 1969 (42 U.S.C. 4321 *et seq.*). The U.S. Environmental Protection Agency (EPA), the U.S. Army Corps of Engineers (USACE), the National Oceanic and Atmospheric Administration (NOAA), the Bureau of Ocean Energy Management (BOEM), the Bureau of Safety and Environmental Enforcement (BSEE), and the Pipeline and Hazardous Materials Safety Administration (PHMSA), among others, are cooperating agencies and will assist in the NEPA process as described in 40 CFR 1501.6; may participate in scoping meeting(s); and will incorporate the Environmental Impact Statement (EIS) into their permitting processes. Comments addressed to the EPA, USACE, or other federal cooperating agencies will be incorporated into the Department of Transportation (DOT) docket and considered as the EIS is developed to ensure consistency with the NEPA process.

All connected actions, permits, approvals and authorizations will be considered in the deepwater port license application review.

MARAD, in issuing this Notice of Application pursuant to section 1504(c) of the Act, must designate as an "Adjacent Coastal State" any coastal state which (A) would be directly connected by pipeline to a deepwater port as proposed in an application, or (B) would be located within 15 miles of any such proposed deepwater port (see 33 U.S.C. 1508(a)(1)). Pursuant to the criteria provided in the Act, Texas is the designated Adjacent Coastal State for this application. Other states may apply for Adjacent Coastal State status in accordance with 33 U.S.C. 1508(a)(2).

The Act directs that at least one public hearing take place in each

Adjacent Coastal State, in this case, Texas. Additional public meetings may be conducted to solicit comments for the environmental analysis to include public scoping meetings, or meetings to discuss the Draft EIS and the Final EIS.

MARAD, in coordination with the USCG, will publish additional **Federal Register** notices with information regarding these public meeting(s) and hearing(s) and other procedural milestones, including the NEPA environmental review. The Maritime Administrator's decision, and other key documents, will be filed in the public docket.

The Deepwater Port Act imposes a strict timeline for processing an application. When MARAD and USCG determine that an application is complete (*i.e.*, contains information sufficient to commence processing), the Act directs that all public hearings on the application be concluded within 240 days from the date the Notice of Application is published.

Within 45 days after the final hearing, the Governor of the Adjacent Coastal State, in this case the Governor of Texas, may notify MARAD of their approval, approval with conditions, or disapproval of the application. MARAD may not issue a license without the explicit or presumptive approval of the Governor of the Adjacent Coastal State. During this 45-day period, the Governor may also notify MARAD of inconsistencies between the application and State programs relating to environmental protection, land and water use, and coastal zone management. In this case, MARAD may condition the license to make it consistent with such state programs (33 U.S.C. 1508(b)(1)). MARAD will not consider written approvals or disapprovals of the application from the Governor of the Adjacent Coastal State until after the final public hearing is complete and the 45-day period commences.

The Maritime Administrator must render a decision on the application within 90 days after the final hearing.

In accordance with section 1504(d) of the Act, MARAD designates an application area encompassing the TGTI deepwater port that is a circle having a 12.7 nautical mile radius centered at latitude 27°28'42.60" N and longitude 97°00'48.43" W. Any person interested in applying for the ownership, construction, and operation of a deepwater port within this designated application area must file with MARAD (see **FOR FURTHER INFORMATION CONTACT**) a notice of intent to file an application not later than 60 days after the date of publication of this notice.

Should a favorable record of decision be rendered and license be issued, MARAD may include specific conditions related to design, construction, operations, environmental permitting, monitoring and mitigations, and financial responsibilities. If a license is issued, USCG in coordination with other agencies as appropriate, would oversee the review and approval of engineering, design, and construction; operations/security procedures; waterways management and regulated navigation areas; maritime safety and security requirements; risk assessment; and compliance with domestic and international laws and regulations for vessels that may call on the port. The deepwater port would be designed, constructed and operated in accordance with applicable codes and standards.

In addition, installation of pipelines and other structures may require permits under Section 404 of the Clean Water Act and Section 10 of the Rivers and Harbors Act, which are administered by the USACE.

Permits from the EPA may also be required pursuant to the provisions of the Clean Air Act, as amended, and the Clean Water Act, as amended.

Summary of the Application

TGTI is proposing to construct, own, and operate a deepwater port terminal in the Gulf of Mexico to export domestically produced crude oil. Use of the DWP would include the loading of various grades of crude oil at flow rates of up to 60,000 barrels per hour (bph). Approximately eight Very Large Crude Carrier (VLCC) vessels (or equivalent volumes) would be loaded per month from the proposed deepwater port. Loading of one VLCC vessel is expected to take 48 hours, including vessel approach, mooring, cargo transfer, and vessel departure.

The overall project would consist of three distinct, but interrelated components: (1) The "offshore" component; (2) the "inshore" component; and (3) the "onshore" component.

The proposed deepwater port (offshore component) would be located approximately 12.7 nautical miles off the coast of North Padre Island (Kleberg County, TX) and consists of 14.71 miles of two new parallel 30-inch diameter crude oil pipelines, which terminate at a single point mooring (SPM) buoy. The SPM buoy system would be positioned in water depths of approximately 93 feet and consist of a pipeline end manifold, catenary anchor leg mooring system, and other associated equipment. The SPM would be located in BOEM lease

block number 823 at latitude 27°28'42.60" N and longitude 97°00'48.43" W.

The inshore components associated with the proposed project include 5.74 miles of two new parallel 30-inch diameter pipelines and onshore valve stations used to connect the onshore project components to offshore project components. The inshore portions of the proposed pipeline infrastructure cross the Laguna Madre Bay complex, the Gulf Intracoastal Waterway, and extend across North Padre Island to the mean high tide line located at the interface of North Padre Island and the Gulf of Mexico. The inshore project components include the installation of an onshore valve station on North Padre Island to allow for the isolation of portions of the proposed pipeline infrastructure for servicing, maintenance, and inspection operations.

Onshore components associated with the proposed project include the construction and operation of an onshore storage terminal facility (OSTF), booster station, and approximately 6.36 miles of two new parallel 30-inch diameter pipelines located within Nueces and Kleberg Counties, TX. The OSTF would occupy approximately 150 acres in Nueces County, TX and would consist of all necessary infrastructure to receive, store, measure and transport crude oil through the proposed inshore and deepwater port pipeline infrastructure. The proposed booster station would occupy approximately 8.25 acres in Kleberg County, TX and would consist of the necessary pumping infrastructure to support the transport of crude oil from the OSTF to the deepwater port. Onshore pipeline infrastructure would extend from the OSTF to the landward side of the mean high tide line located at the interface of the western shoreline of the Laguna Madre.

Privacy Act

In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to better inform its administrative and rulemaking processes. DOT posts comments, without edit, to www.regulations.gov, as described in the system of records notice, DOT/ALL-14 FDMS, accessible through www.dot.gov/privacy. To facilitate comment tracking and response, we encourage commenters to provide their name, or the name of their organization; however, submission of names is completely optional. Whether or not commenters identify themselves, all timely comments will be fully considered. If you wish to provide comments containing proprietary or

confidential information, please contact the agency for alternate submission instructions.

(Authority: 33 U.S.C. 1501, *et seq.*; 49 CFR 1.93(h))

Dated: July 31, 2018.

By Order of the Maritime Administrator.

T. Mitchell Hudson, Jr.,
Secretary, Maritime Administration.

BILLING CODE 4910-81-P

DEPARTMENT OF VETERANS AFFAIRS

Disciplinary Appeals Board Panel

AGENCY: Department of Veterans Affairs

ACTION: Notice with request for comments.

SUMMARY: Section 203 of the Department of Veterans Affairs Health Care Personnel Act of 1991 (Pub. L. 102-40), dated May 7, 1991, revised the disciplinary grievance and appeal procedures for employees. It also required the periodic designation of employees of the Department who are qualified to serve on Disciplinary Appeals Boards. These employees constitute the Disciplinary Appeals Board Panel from which Board members in a case are appointed. This notice announces that the roster of employees on the Panel is available for review and comment. Employees, employee organizations, and other interested parties shall be provided, without charge, a list of the names of employees on the Panel upon request and may submit comments concerning the suitability for service on the Panel of any employee whose name is on the list. **DATES:** Names that appear on the Panel may be selected to serve on a Board or as a grievance examiner after September 5, 2018.

ADDRESSES: Requests for the list of names of employees on the Panel and written comments may be directed to: Secretary of Veterans Affairs, Department of Veterans Affairs, 810 Vermont Avenue NW, Washington, DC 20420. Requests and comments may also be faxed to (202) 495-5200.

FOR FURTHER INFORMATION CONTACT: Jennifer Hayek, Employee Relations & Performance Management Service, Office of Human Resources Management, Department of Veterans Affairs, 810 Vermont Avenue NW, Mailstop 051, Washington, DC 20420. Ms. Hayek may be reached at (440) 525-5493.

SUPPLEMENTARY INFORMATION: Public Law 102-40 requires that the
