Corpus Christi, Texas 78411

**RE: Permit Application SWG-2018-00789
Revised Application w/Requested Information
Axis Midstream Holdings, LLC
Midway to Harbor Island Pipelines & Terminal
San Patricio & Nueces Counties, Texas**

Dear Mr. Jones:

On behalf of Axis Midstream Holdings, LLC and pursuant to your February 1, 2019 letter, please find attached the additional information your office has requested for the above referenced; as such, we offer the following:

*“Based on our review of your permit application and information obtained during a meeting held at the Corpus Christi Regulatory Field Office (CCRFO) on January 30, 2019, we have determined that your permit application is incomplete. In order to determine that the permit application is Federally complete for an Internal Review and for publication of a Public Notice, additional information must be submitted.” **

1. *“As stated in our meeting at the CCRFO, we identified that your stated project purpose and need is not sufficient enough to develop a reasonable and practicable alternatives analysis and it is not supported by what is actually being proposed.” **

Upon submitting the original permit application, the Harbor Island Loading Terminal (Harbor Island) was not a component of the project. As discussed in our meeting and requested in your letter, the preliminary layout and design have been completed and this information has been included in the attached updated ENG 4345 Form (**Attachment 1**) and permit drawings (**Attachment 2**). Inclusion of the loading facilities at Harbor Island now supports the stated project purpose *“to construct a series of facilities and pipelines to transport crude oil for loading onto marine transport vessels.”*

*“Additionally, the purpose and need for each facility is not clearly defined. We require that you revise your purpose and need statement and/or revise your proposed project description, so they coincide with each other including the purpose and needs for the facilities and pipelines.” **

An updated Purpose and Need document has been prepared and is provided in this submittal to address the design function of all components of the project (**Attachment 3**). The project components addressed are the Midway Tank Farm (Midway), Midway to Aransas Pass Staging Facility (Aransas Facility) Pipelines, the Aransas Facility, Aransas Facility to Harbor Island Pipelines and the Harbor Island Loading Terminal.

2. *“It was brought to our attention that there may be a potential second 42-inch crude oil pipeline added to the route between the proposed Midway Facility and the Redfish Facility.” **

As detailed in the updated permit drawings, 2-36” pipelines are being proposed to transport crude oil from Midway to the Aransas Facility. As mentioned above, the design requirements for these lines are addressed in the updated Purpose and Need document. Subsequent to the acquisition of additional site data, a modification to the location and layout of the Aransas Facility has been made. The Aransas Facility has been redesigned to minimize impacts and maximize the use of non-wetland areas to the extent practicable. The updated permit drawings reflect this location and layout change which includes a pipeline alignment adjustment to accommodate the Aransas Facility.

*“Additionally, it was unclear where the temporary work area for the horizontal directional drilling (HDD) locations would be to cross the GIWW and how the pipeline would be installed across Redfish Fish Bay.” **

The plan profile of the horizontal directional drill (HDD) has been updated to identify the coordinates of the HDD entry and exist points. Additionally, the required workspaces have been identified and dimensions notated in the permit drawings (**Attachment 2**).

*“There were also other inconsistencies with the proposed permit drawings that were addressed that included, but not limited too temporary placement of fill locations in Redfish Bay, temporary work areas in Redfish Bay, and installation or construction description of how the pipeline would be installed in Redfish Bay.” **

The plan view and detailed cross sections have been more clearly detailed in the permit drawings (**Attachment 2**). The updated cross sections reflect the temporary workspaces and the temporary placement of spoil material for construction. Impact areas within the temporary workspace are shown on the various plan view segments.

*“It is unclear what the order of construction would be as well.” **

Included in this response is a description of the Construction Methodology and sequence for installation of the pipelines associated with the project (**Attachment 4**).

3. *“We require that a wetland and water data table be submitted that includes the data required to sufficiently fulfil your request for a preliminary jurisdictional determination (PJD).” **

The updated PJD Excel Spreadsheet is included for your review (**Attachment 5**).

*"The following information is not needed to deem the project Federally Complete. However, this information is needed to complete our review of the proposed project." **

1. *"A Mitigation Plan, in accordance with 33 CFR 332, providing full compensation for all impacts associated with the proposed project." **

PCS has begun preliminary discussions regarding mitigation with the Texas Parks and Wildlife Department (TPWD) for impacts within the Redfish Bay State Scientific Study Area. The revised plan drawings contain a "conceptual" mitigation plan. This conceptual plan will require further vetting and development with the agencies.

2. *"An analysis of alternatives that documents the process of avoidance and minimization of impacts to jurisdictional areas. A thorough alternative analysis should include a no action alternative, multiple offsite location alternatives, and multiple onsite alternatives. The offsite alternatives should include siting criteria and specific reasons for why these sites were not selected as the least environmentally-damaging practicable alternative with regard to the aquatic resources." **

A draft alternatives analysis is currently being prepared and will be provided upon completion.

Should there be any questions or if I can be of further assistance, do not hesitate in contacting me at (713) 407-2480 or at rganczak@projectconsulting.com or Richard Leonhard at (504) 219-3454 or rleonhard@projectconsulting.com.

Sincerely,

PROJECT CONSULTING SERVICES, INC.

Robert Ganczak

REVISED PERMIT APPLICATION

- 1.1 ENG FORM 4345**
- 1.2 APPLICATION SUPPLEMENT – #21 & #22**
- 1.3 IMPACT BREAKDOWN TABLE**
- 1.4 LANDOWNER LIST**

17. DIRECTIONS TO THE SITE

Midway Tank Farm - ± 5.0 miles south of Taft, TX. North of the intersection of FM 893 and FM 1074.
Aransas Pass Staging Facility - ± 2.25 miles south of Aransas Pass, TX. South of the intersection of Hwy. 138 and FM 2725.
Harbor Island Terminal - ± west of Port Aransas, TX. West of Hwy. 361 ferry crossing.

18. Nature of Activity (Description of project, include all features)

The project consists of three facilities interconnected by a series of pipelines. As detailed in the permit drawings, the project will initiate at the proposed Midway Tank Farm south of the City of Taft, Texas, extend southeasterly to the Aransas Pass Staging Facility, west of the City of Aransas Pass, connected by 1-2" fiber optic and 2-36" oil pipelines. From the Aransas Pass Staging Facility the project continues southeasterly with a series of pipelines (1-2" Fiber Optic, 1-6" Gas Supply, 1-16" Intermix Return and 2-42" Crude Pipelines) to the Harbor Island Loading Terminal site. At Harbor Island a marine off-loading terminal and slip will be constructed.

19. Project Purpose (Describe the reason or purpose of the project, see instructions)

Axis proposes to construct a series of facilities and pipelines to transport crude oil for loading onto marine transport vessels. [See Attached "Purpose and Needs" Document.]

USE BLOCKS 20-23 IF DREDGED AND/OR FILL MATERIAL IS TO BE DISCHARGED

20. Reason(s) for Discharge

Midway Tank Farm - No jurisdictional wetlands or sensitive features
Midway Tank Farm to Aransas Pass Staging Facility pipelines - Excavation & backfill for pipeline installation
Aransas Pass Staging Facility - Fill for facility installation and construction of emergency access road
Aransas Staging Facility Facility to Harbor Island Loading Terminal- Excavation & backfill for pipeline installation
Harbor Island Loading Terminal - Excavation for enlargement and deepening of the docking facility

21. Type(s) of Material Being Discharged and the Amount of Each Type in Cubic Yards:

Type Amount in Cubic Yards	Type Amount in Cubic Yards	Type Amount in Cubic Yards
See Attached Document		

22. Surface Area in Acres of Wetlands or Other Waters Filled (see instructions)

Acres See Attached Document
or
Linear Feet

23. Description of Avoidance, Minimization, and Compensation (see instructions)

On land the pipeline is situated in agricultural fields and adjacent to existing pipeline corridors to the maximum extent practicable. The applicant will use horizontal directional drilling to cross the GIWW and avoid impacts to seagrasses. Within Redfish Bay the pipelines will be installed within existing oil and gas infrastructure to the maximum extent practicable. Best management practices (i.e., turbidity curtains, etc.) will be installed to minimize impacts to water quality.
A conceptual mitigation plan involving bank stabilization along the Corpus Christi Ship Channel is being proposed. The project is intended to protect seagrass habitat within Redfish Bay.

24. Is Any Portion of the Work Already Complete? Yes No IF YES, DESCRIBE THE COMPLETED WORK

25. Addresses of Adjoining Property Owners, Lessees, Etc., Whose Property Adjoins the Waterbody (if more than can be entered here, please attach a supplemental list).

a. Address- SEE ATTACHED LANDOWNER LIST
