

HEALTHCARE/ MEDICAL

*Operating Rooms
Reception Areas*

Whether it's a hospital, medical/dental office, emergency room, laboratory, patient room, surgical suite, mechanical room, cafeteria, or laundry room, ProREZ can design and specify the right seamless floor coating solution for your space.

The ProREZ[™] Advantage... Innovation beneath your feet.

Beneath the feet, these seamless flooring systems need to demonstrate unwavering performance and reliability. Few industries are as dependent on long-lasting, sanitary flooring as the healthcare and medical industry. The flooring must be designed, specified, and installed to withstand the continual wear and tear from heavy foot, mobile equipment, gurney, and wheelchair traffic found in these highly demanding, 24/7 environments. Let us focus on your flooring needs, so you can take good care of what really matters to you — the patients.

DIVERSE AND UNIQUE SPACES

In order to make the healthcare or medical setting more appealing to its diverse body of personnel, patients, and visitors, it is important that the seamless floor coating is highly durable, provides a reliably safe surface, and is aesthetically pleasing and complementary to the overall design, décor, and atmosphere of the unique spaces found in these types of settings. No one system does it all. ProREZ engineers, specifies, and customizes its seamless floor coating, resurfacing and integral cove base systems for a wide array of healthcare spaces that are built tough, chemical, stain and puncture resistant, and simple to maintain requiring no stripping, waxing, or buffing — reducing life-cycle costs.

RECOMMENDED FLOORING SOLUTIONS

STORAGE & UTILITY AREAS

Light/Medium Duty Clear Systems (20-40 mils): **ProSeal CS** | **ProCryl CS**

Light/Medium Duty Solid Color Systems (20-40 mils): **ProShield SC** | **ProCryl SC**

Light/Medium Duty Solid Color Non-Skid Systems (1/16"-1/8"): **ProShield SF-100B/200B**

Hygienic and Safe

Medical-related facilities accumulate dirt, bacteria and other contaminants, yet must be pristine, pathogen-free, hygienic environments. ProREZ seamless, non-porous, waterproof, protective flooring finishes balance slip-resistance with ease-of-cleaning and sanitization, ensuring safety under foot for healthcare and medical personnel, patients, and visitors, while meeting or exceeding all local, state, federal inspection and safety requirements.

Low Odor, Fast Setting Materials

Busy healthcare facilities cannot afford expensive downtime, tainted with hazardous odors. Maintaining indoor air quality with low-odor, zero VOC materials, and offering quicker installations and turn-around times for repairs, refurbishments, or new installations without extended disruptions to operational schedules are real ProREZ benefits.

Long-Term Value in Protection and Performance

The value of the floor coating is comparing its overall cost and maintenance to its long-term performance and durability. ProREZ engineers carefully assess each space considering its unique environmental, functional, aesthetic, and budgetary requirements.

Customizable Finishes

ProREZ designs and specifies aesthetically pleasing, industrial strength flooring systems available in a wide selection of standard and custom colors, blends, patterns, and textures to complement any facility. Custom designs including special borders, insignias and other useful floor markings can be integrated to enhance overall image, safety, and productivity.

RECOMMENDED FLOORING SOLUTIONS

RECEPTION AREAS, OPERATING SUITES, PATIENT ROOMS. LAB AREAS

Medium Duty Decorative Quartz Systems (1/16"-1/8"): **ProQuartz** | **ProCryl CQ**
