

## AVIATION

*Aviation Hangars*

*Aerospace Facilities*

ProREZ™ offers highly durable floor systems for the storage, repair and maintenance of commercial and government aircraft with excellent resistance to traffic, abrasion, petrochemicals, solvents, and aircraft fluids.

*The ProREZ™ Advantage... Innovation beneath your feet.*

## AVIATION HANGARS

Whether storage, maintenance, or fuel hangar, aviation flooring systems must be high-performance and hard-wearing, with excellent chemical, stain, and abrasion resistance. ProREZ seamless, non-porous, high-gloss coating solutions are functionally and aesthetically pleasing with bright, light-reflective colors offering both enhanced visibility and safety.

Our systems are highly moisture-tolerant, UV stable, durable with long-lasting finishes. We offer various non-skid textures, balancing safety concerns with ease of cleaning and maintenance.

Line striping, special floor markings, as well as integrating different colored borders can help establish maintenance and aircraft parking zones, as well as enhance the overall image of the hangar. Custom floor logos and special messages can also be imbedded into the system.

## RECOMMENDED FLOORING SOLUTIONS

Light Duty Systems (20-40 mils): [ProShield SC](#) | [ProCryl SC](#)

Medium Duty Systems (1/16"-1/8"): [ProShield SL-60](#) | [ProShield SL-100](#) | [ProCryl SL](#)

Heavy Duty Systems (1/8"-1/4"): [ProKrete SL Hybrid](#)

## AEROSPACE FACILITIES

The aerospace facility has varying floor coating and resurfacing needs subject to the unique requirements of specific areas and departments from manufacturing and assembly to maintenance, storage, and public spaces. A well-designed and specified flooring system must deliver great aesthetics, unwavering performance, and long service life.

Safety requirements include skid resistance to help prevent slip hazards, excellent chemical resistance to withstand staining and system degradation, abrasion resistance to endure heavy traffic, fast curing materials for quicker return to service, as well as customized finishes for aesthetics, ergonomics, and branding.
