

ANIMAL CARE

Veterinary Clinics

Boarding Kennels

Whether it's an operating or exam room, laboratory, reception or waiting room, kennel or boarding area, ProREZ™ can design and specify the right seamless floor coating solution for your space.

The ProREZ™ Advantage... Innovation beneath your feet.

Beneath the feet and paws, these seamless floor coating systems need to continuously look good while demonstrating steadfast performance and reliability. Few industries are as dependent on long-lasting, sanitary flooring as the veterinary and animal care industry. Animal care and boarding kennels continue to grow as more and more families require short-term shelter and assistance with their animals in facilities like daycare, grooming spas, training centers, and pet resorts. The flooring in these multi-purpose spaces must be designed, specified, and installed to withstand the continual wear and tear from paws, claws, exposures to animal waste, aggressive cleaners and sanitizers, and heavy foot traffic.

DIVERSE AND UNIQUE SPACES

In order to make the veterinary and animal care setting more appealing to its personnel, animal owners, and visitors, it is important that the seamless floor coating be highly durable, provides a reliably safe surface, and is aesthetically pleasing and complementary to the overall design, décor, and atmosphere of the unique spaces found in these types of settings. ProREZ engineers, specifies, and customizes its seamless floor coating, resurfacing, and integral cove base systems for a wide array of veterinary and animal care spaces that are built tough, chemical, stain & puncture resistant, and simple to maintain — reducing maintenance, repairs, and overall life-cycle costs.

RECOMMENDED FLOORING SOLUTIONS: KENNEL AREAS

Heavy Duty Systems (1/8"-1/4"): Solid Colored: [ProKrete SLB](#) | [ProCryl SLB](#)

Heavy Duty Systems (1/8"-1/4"): Decorative Quartz: [ProKrete SLQ](#) | [ProCryl SLQ](#)

Hygienic and Safe

Animal care facilities accumulate dirt, bacteria and other contaminants, yet must be clean and pathogen-free environments. ProREZ seamless, non-porous, waterproof, protective flooring finishes balance slip-resistance with ease-of-cleaning and sanitization, ensuring safety under foot for sensitive animal pads, personnel and visitors, while meeting or exceeding all local, state, federal inspection and safety requirements.

Low Odor, Fast Setting Materials

These busy facilities cannot afford expensive downtime, tainted with hazardous odors. Maintaining indoor air quality with low-odor materials, and offering quicker installations and turn-around times for repairs, refurbishments, or new installations without extended disruptions to operational schedules are real ProREZ benefits.

Long-Term Value in Protection and Performance

The value of the floor coating is comparing its overall cost and maintenance to its long-term performance and durability. ProREZ engineers carefully assess each space considering its unique environmental, functional, aesthetic, and budgetary requirements.

Customizable Finishes

ProREZ designs and specifies aesthetically pleasing, industrial strength flooring systems available in a wide selection of standard and custom colors, blends, patterns, and textures to complement any facility. Custom designs including special borders and insignias can be integrated to enhance overall image, safety, and productivity.

RECOMMENDED FLOORING SOLUTIONS

RECEPTION AREAS, OPERATING AREAS, KENNEL AREAS

Medium Duty Systems (1/16"-1/8"): Decorative Quartz: **ProQuartz** | **ProCryl CQ**

Medium Duty Systems (1/16"-1/8"): Decorative Flake: **ProFlake** | **ProCryl CF**

Medium Duty Systems (1/16"): Decorative Metallic: **ProLumina**
